366	heat	n.	Extreme and prolonged heat is dangerous for all people and wildlife.
367	household	n.	Average household energy consumption has increased significantly in recent years.
368	housing	n.	Truly affordable housing is extremely difficult to find in large cities.
369	hunger	n.	Hunger continues to affect many millions of people in developing countries.
370	ignore	v.	We simply cannot continue to ignore the effects of climate change.
371	income	n.	Low-income families consistently struggle to access quality education.
372	independent	adj.	Strong independent research skills are highly valued at university level.
373	individual	n.	Every individual citizen can make a real difference to the environment.
374	invest	v.	All countries should significantly invest in renewable energy sources.
375	island	n.	Small island nations face existential threats from rising sea levels.
376	issue	n.	Plastic waste is now a major and urgent global environmental issue.
377	knowledge	n.	A solid knowledge of academic grammar is essential for the IELTS exam.
378	law	n.	Environmental protection laws must be enforced much more strictly.
379	leader	n.	World leaders met to discuss and agree on urgent climate action.
380	leisure	n.	People in developed countries generally have more personal leisure time.
381	location	n.	The precise location of the school significantly affects student performance.
382	loss	n.	The accelerating loss of global biodiversity is extremely alarming.
383	marine	adj.	Marine pollution now poses a very serious threat to all fish populations.
384	material	n.	Using recyclable materials helps significantly reduce landfill waste.
385	media	n.	The media plays a very important role in raising public awareness.
386	medical	adj.	Major medical advances have significantly extended average global life expectancy.
387	mental	adj.	Mental health is just as critically important as physical health.
388	migration	n.	Large-scale migration to cities is putting enormous pressure on services.
389	minimum	adj.	Last winter the minimum recorded temperature was minus ten degrees.
390	movement	n.	The global environmental movement has grown enormously in recent years.

391	negative	adj.	Widespread pollution has a profoundly negative impact on public health.
392	neighbourhood	n.	Green spaces and parks improve the overall quality of a neighbourhood.
393	network	n.	A reliable and efficient transport network significantly reduces car use.
394	option	n.	Renewable energy is now a genuinely realistic option for many countries.
395	organic	adj.	Organic farming greatly reduces the use of harmful synthetic chemicals.
396	paragraph	n.	Always begin each paragraph with a very clear topic sentence.
397	particular	adj.	Pay particular attention to all the linking words and phrases.
398	pattern	n.	The graph shows a very clear and consistent pattern of increase.
399	performance	n.	Consistent regular practice significantly improves exam performance.
400	permanent	adj.	Some forms of serious environmental damage are sadly permanent.
401	physical	adj.	Regular physical activity significantly reduces the serious risk of obesity.
402	planet	n.	We have a moral duty to protect our planet for future generations.
403	plastic	n.	The problem of single-use plastic waste is very serious and urgent.
404	policy	n.	Strong and enforceable environmental policies are now urgently needed.
405	pollution	n.	Air pollution is responsible for millions of premature deaths every year.
406	population	n.	The world's total population is expected to reach ten billion.
407	positive	adj.	Renewable energy has a very positive long-term effect on the environment.
408	poverty	n.	Poverty is closely linked to poor health and very low educational levels.
409	prediction	n.	The scientific prediction for rising sea levels is genuinely alarming.
410	price	n.	The cost and price of renewable energy has fallen very significantly.
411	profit	n.	Companies should never put short-term profit above environmental protection.
412	progress	n.	Great and significant progress has been made in reducing carbon emissions.
413	proper	adj.	Proper and responsible waste disposal is absolutely essential for public health.
414	protein	n.	Protein is a nutritionally essential part of a healthy balanced diet.
415	prove	v.	The available data clearly proves that global temperatures are rising.
416	publish	v.	The important research was published in a prestigious international journal.
417	purchase	v.	Many environmentally conscious consumers now purchase eco-friendly products.
418	rare	adj.	Very rare species are always at the greatest risk from habitat loss.
419	recycle	v.	Most households now recycle paper, glass, and plastic regularly.
420	reform	n.	Significant educational reform is urgently needed to better prepare students.
421	relationship	n.	There is a very clear and direct relationship between poverty and pollution.
422	remain	v.	Temperatures remain dangerously high during the long summer months.
423	renewable	adj.	Renewable energy sources include wind, solar, and hydroelectric power.

424	report	v.	The important study reports a significant and sustained increase in emissions.
425	research	n.	New and significant research confirms the clear link between diet and health.
426	responsible	adj.	All governments are responsible for adequately protecting natural resources.
427	restore	v.	Major efforts are now being made to restore badly damaged ecosystems.
428	revenue	n.	International tourism generates very significant revenue for local economies.
429	road	n.	Poor road conditions significantly increase the overall risk of accidents.
430	sample	n.	The researcher carefully collected a large representative sample of river water.
431	signal	v.	The available data signals a genuinely worrying and persistent long-term trend.
432	significant	adj.	There has been a very significant and sustained rise in global temperatures.
433	smart	adj.	Smart cities use advanced technology to improve the quality of urban living.
434	solar	adj.	Solar panels are now more affordable and accessible than ever before.
435	species	n.	Hundreds of important species become extinct every single year.
436	spread	v.	Infectious disease can spread with alarming rapidity in crowded urban areas.
437	stable	adj.	A consistently stable and growing economy benefits all citizens.
438	standard	n.	Living standards have improved significantly in many developing countries.
439	statistic	n.	The latest statistics clearly show that air quality has improved.
440	steady	adj.	There was a steady and consistent increase in temperatures throughout the decade.
441	step	n.	The very first step is to significantly reduce your energy consumption.
442	stress	n.	Chronic and persistent stress is a major cause of serious health problems.
443	strict	adj.	Much stricter laws are urgently needed to adequately protect endangered species.
444	suburb	n.	Many growing families move to quieter and greener suburbs for a better life.
445	suitable	adj.	Always choose the most suitable vocabulary for your academic writing.
446	supply	n.	The fresh water supply in many regions is under increasing threat.
447	surface	n.	The average surface temperature of the ocean has risen noticeably.
448	sustainable	adj.	Sustainable development carefully meets the needs of the present generation.
449	target	n.	The government has set an ambitious target to plant a million trees.
450	task	n.	Read every part of the task very carefully before writing.
451	temperature	n.	Average global temperatures have risen by over one degree Celsius.
452	threat	n.	Large-scale deforestation is a very serious and growing threat to biodiversity.
453	trade	n.	International trade has grown enormously and rapidly in recent decades.
454	unemployed	adj.	Many young people sadly remain unemployed for years after graduating.
455	university	n.	She successfully applied to and was accepted by three leading universities.

456	useful	adj.	A wide and varied vocabulary is useful in all four IELTS skills.
457	various	adj.	There are various practical ways to significantly reduce energy consumption.
458	vehicle	n.	Electric vehicles produce far fewer harmful emissions than petrol cars.
459	volunteer	v.	Many dedicated students regularly volunteer for worthwhile environmental projects.
460	wealth	n.	Access to quality education is very closely linked to personal wealth.
461	welfare	n.	The welfare of all animals must be considered in farming practices.
462	wildlife	n.	Wildlife is significantly threatened by habitat loss and climate change.
463	within	prep.	Major changes occurred rapidly within a very short and unexpected time period.
464	without	prep.	Without urgent and decisive action, climate change will continue to worsen.
465	workforce	n.	The modern workforce urgently needs new skills for the digital economy.
466	zero	n.	The ambitious goal is to reach zero net carbon emissions by 2050.
467	abstract	adj.	Justice and freedom are important but abstract concepts.
468	academic	adj.	Academic writing requires a formal tone and precise vocabulary.
469	access	n.	Not everyone has equal access to quality healthcare.
470	accommodate	v.	The new policy must accommodate different learning needs.
471	acknowledge	v.	The report acknowledges the urgent need for change.
472	acquire	v.	Children acquire language naturally through play and daily interaction.
473	adapt	v.	Animals must adapt to survive in a changing environment.
474	adequate	adj.	Adequate sleep is absolutely essential for concentration and memory.
475	administration	n.	The administration of large cities is becoming increasingly complex.
476	adopt	v.	Many countries have now adopted cleaner energy policies.
477	advance	v.	Science and technology continue to advance at a remarkable pace.
478	advocate	v.	Health experts advocate regular physical activity for all ages.
479	allocate	v.	The government plans to allocate more funds to public education.
480	alter	v.	Climate change may significantly alter traditional rainfall patterns.
481	alternative	n.	Cycling is a cheap and environmentally friendly alternative to driving.
482	ambiguous	adj.	The question was ambiguous and therefore difficult to interpret correctly.
483	analyse	v.	Students must carefully analyse the data before writing their report.
484	apparent	adj.	It was apparent from the data that the trend was increasing.
485	approach	n.	A problem-solving approach is very useful in scientific research.
486	approximately	adv.	The total population grew by approximately five percent per year.
487	assess	v.	Teachers regularly assess students through both written and oral tests.
488	assign	v.	The teacher assigned a detailed research task to each group.

489	assume	v.	Do not assume that all your readers share the same background.
490	authority	n.	Local authorities are responsible for waste collection and management.
491	balance	n.	A healthy lifestyle requires a careful balance of work and rest.
492	bias	n.	Media coverage of political issues can sometimes show significant bias.
493	broad	adj.	The essay covers a broad range of important environmental issues.
494	capacity	n.	The new stadium has a total capacity of over 80,000 spectators.
495	capture	v.	Photographs can effectively capture very important historical moments.
496	challenge	n.	Climate change is arguably the greatest challenge of our time.
497	circumstance	n.	The outcome of any situation depends heavily on the circumstances.
498	classify	v.	Biologists carefully classify living organisms into clearly defined groups.
499	collaborate	v.	Students consistently learn more effectively when they collaborate on tasks.
500	commitment	n.	IELTS success requires both genuine commitment and consistent practice.
501	complex	adj.	The relationship between poverty and health is more complex than it appears.
502	component	n.	Protein is an essential component of a genuinely balanced diet.
503	concentrate	v.	You must concentrate very carefully during the listening test.
504	concept	n.	Sustainability is one of the most important concepts in modern life.
505	conclude	v.	The research report clearly concludes that immediate action is required.
506	conduct	v.	Scientists carefully conduct experiments to test and validate hypotheses.
507	conflict	n.	Many unnecessary conflicts arise from poor communication and misunderstanding.
508	consequence	n.	Pollution has very severe and long-term consequences for public health.
509	consistent	adj.	A consistent study routine will lead to much better exam results.
510	construct	v.	The government plans to construct several important new hospitals this year.
511	consume	v.	Developed nations consume far more energy per person than developing ones.
512	context	n.	Always read a new vocabulary word in its full context.
513	contrast	v.	The essay effectively contrasts the benefits of urban and rural life.
514	controversy	n.	The new energy policy caused considerable and widespread political controversy.
515	conventional	adj.	Conventional farming relies too heavily on artificial fertilisers.
516	convince	v.	The scientific evidence convinced many governments to urgently act on emissions.
517	cope	v.	Some coastal communities genuinely struggle to cope with severe flooding.
518	criteria	n.	IELTS essays are carefully judged against four main assessment criteria.
519	decline	v.	Wild fish populations have declined very sharply due to overfishing.
520	dedicate	v.	She dedicated more than ten years of her career to improving literacy.

521	demonstrate	v.	The data clearly demonstrates a strong and consistent upward trend.
522	derive	v.	Many English words derive their meaning from Greek or Latin roots.
523	detect	v.	Satellites can now accurately detect changes in forest cover from space.
524	determine	v.	A combination of key factors determines a student's academic success.
525	diverse	adj.	The city has a rich and genuinely diverse multicultural population.
526	divide	v.	The country is divided into twelve clearly defined administrative regions.
527	dominant	adj.	English has become the dominant language of international communication.
528	dramatic	adj.	There has been a very dramatic increase in online shopping worldwide.
529	emerge	v.	Innovative new solutions are beginning to emerge to tackle climate change.
530	emphasis	n.	The IELTS course places great emphasis on developing writing skills.
531	enable	v.	Digital technology enables people to work productively from almost anywhere.
532	encounter	v.	Students frequently encounter unfamiliar vocabulary in reading test passages.
533	enforce	v.	Environmental regulations must now be enforced much more strictly.
534	ensure	v.	Please ensure that your essay is clearly organised before submitting.
535	establish	v.	The new policy established stricter environmental guidelines for all businesses.
536	evaluate	v.	Students must evaluate both the strengths and weaknesses of each argument.
537	evolve	v.	Languages are living systems that evolve and change constantly over time.
538	exclude	v.	The study excluded all participants who were below the age of eighteen.
539	expand	v.	The city has expanded dramatically in recent decades.
540	experience	v.	Many migrants genuinely experience difficulties when adjusting to a new culture.
541	experiment	n.	The controlled experiment successfully proved the scientists' hypothesis.
542	exploit	v.	Some multinational companies exploit natural resources in an unsustainable way.
543	expose	v.	Living near industrial areas can expose residents to dangerous air toxins.
544	extent	n.	The full extent of the environmental damage was not initially clear.
545	facilitate	v.	Good transport infrastructure effectively facilitates economic growth.
546	feature	n.	A key feature of strong academic writing is clarity and objectivity.
547	fluctuate	v.	Global oil prices fluctuate constantly depending on supply and demand.
548	foundation	n.	A solid foundation in vocabulary is absolutely essential for IELTS success.
549	function	n.	The primary function of this graph is to illustrate important long-term trends.
550	fundamental	adj.	Access to clean water is a fundamental right of every human being.
551	highlight	v.	The report highlights the urgent need for greater investment in renewables.
552	hypothesis	n.	The researcher carefully formulated and then tested a new scientific hypothesis.

553	identify	v.	Always clearly identify the main features of the graph in your introduction.
554	illustrate	v.	This clear diagram effectively illustrates the water cycle process.
555	imply	v.	The available data implies that energy demand will continue to rise.
556	impose	v.	The government imposed much stricter regulations on industrial carbon emissions.
557	indicate	v.	The survey clearly indicates that most people prefer living in cities.
558	inequality	n.	Growing economic inequality is increasing in many parts of the world.
559	inevitable	adj.	In a rapidly changing world, some degree of social change is inevitable.
560	influence	v.	Social media powerfully influences the opinions and values of young people.
561	infrastructure	n.	Poor infrastructure is one of the main limitations on economic development.
562	initiative	n.	The government launched an ambitious initiative to reduce single-use plastic.
563	insight	n.	The long-term study provides valuable insight into human behaviour patterns.
564	integrate	v.	Schools should integrate digital technology into daily classroom activities.
565	interpret	v.	It is essential to interpret all data objectively and without personal bias.
566	investigate	v.	Researchers thoroughly investigated the long-term effects of urban air pollution.
567	justify	v.	Every argument in your essay must be justified with relevant evidence.
568	labour	n.	Many key industries currently face a serious shortage of skilled labour.
569	launch	v.	The company successfully launched an innovative new range of electric vehicles.
570	maintain	v.	It is genuinely challenging to maintain a balanced diet when busy.
571	mechanism	n.	Breathing is one of the most fundamental biological mechanisms of life.
572	migrate	v.	Millions of birds migrate thousands of kilometres south during winter.
573	minority	n.	All truly democratic societies must protect the rights of minority groups.
574	modify	v.	The research team modified the original experimental design for greater accuracy.
575	monitor	v.	Environmental authorities continuously monitor air quality in all major cities.
576	motivate	v.	Effective teachers find creative ways to genuinely motivate their students.
577	objective	n.	The primary objective of the project is to significantly reduce carbon emissions.
578	obtain	v.	International students can usually obtain a visa at the local embassy.
579	opposition	n.	The controversial new policy met with strong and widespread public opposition.
580	outcome	n.	The actual outcome of the experiment was completely unexpected by researchers.
581	overcome	v.	With determination and good support, students can overcome most obstacles.
582	participate	v.	All students are actively encouraged to participate in class discussions.

583	perception	n.	Our individual perception of the world is shaped by personal experience.
584	potential	adj.	Solar energy has enormous untapped potential as a global energy source.
585	predict	v.	Climate scientists predict that global temperatures will continue to rise.
586	priority	n.	Reducing harmful carbon emissions must now be treated as a global priority.
587	process	n.	Industrial recycling is a complex and multi-stage process.
588	promote	v.	The government actively promotes the wider use of sustainable public transport.
589	proportion	n.	A very large proportion of global energy still comes from fossil fuels.
590	propose	v.	The lead researcher proposed an innovative and practical solution to the problem.
591	pursue	v.	After graduating, she decided to pursue a rewarding career in environmental law.
592	range	n.	A wide range of complex factors affects individual academic performance.
593	realistic	adj.	Always set realistic and genuinely achievable targets in your study plan.
594	recommend	v.	Health experts strongly recommend reducing red meat consumption significantly.
595	record	v.	Scientists carefully record daily temperature changes at thousands of stations worldwide.
596	recover	v.	The national economy is slowly and gradually recovering from the deep recession.
597	reflect	v.	A truly good essay should reflect the writer's original ideas and thinking.
598	regulate	v.	Most governments strictly regulate the agricultural use of harmful pesticides.
599	reinforce	v.	Well-chosen and relevant examples effectively reinforce the central argument.
600	reject	v.	The independent committee formally rejected the controversial new proposal.
601	relevant	adj.	Ensure that all the information in your essay is directly relevant.
602	rely	v.	Many rural communities rely almost entirely on subsistence agriculture.
603	represent	v.	The bar chart represents comparative data from ten different countries.
604	resource	n.	Fresh water is increasingly recognised as a precious and finite natural resource.
605	respond	v.	Students should always respond precisely to the exact question that is asked.
606	restriction	n.	There are strict legal restrictions on the use of certain harmful chemicals.
607	reveal	v.	The large-scale survey reveals some interesting and unexpected behavioural patterns.
608	review	v.	Always carefully review your essay for grammatical errors before submitting.
609	revise	v.	You should revise all your key vocabulary notes at least once every week.
610	risk	n.	Long-term exposure to air pollution poses very serious risks to human health.
611	rural	adj.	Rural communities often have access to fewer educational opportunities.

612	scale	n.	Climate change is a problem that requires action on a truly global scale.
613	scenario	n.	In the worst-case scenario, global sea levels could rise by two metres.
614	sector	n.	The renewable energy sector has been growing very rapidly for years.
615	simultaneously	adv.	These two complex chemical processes occur simultaneously within the cell.
616	solution	n.	There is no single simple solution to the enormous challenge of climate change.
617	specify	v.	Always specify clearly what type of graph you are describing.
618	statistical	adj.	The report contains important and carefully analysed statistical data.
619	strategy	n.	A well-organised study strategy that includes regular revision is highly effective.
620	substitute	v.	In many recipes you can easily substitute butter with a healthier alternative.
621	sufficient	adj.	Is the evidence in the essay sufficient to support the conclusion?
622	tension	n.	There is a growing tension between economic development and environmental conservation.
623	theory	n.	Darwin's groundbreaking theory of evolution transformed our understanding of life.
624	throughout	prep.	Average temperatures rose steadily throughout every month of the year.
625	transfer	v.	Advanced clean energy technology should be transferred to developing nations.
626	transform	v.	Digital tools are rapidly and fundamentally transforming the modern classroom.
627	transition	n.	The country is making a very challenging transition to fully renewable energy.
628	transport	n.	Efficient and affordable transport systems help greatly reduce urban air pollution.
629	trigger	v.	Prolonged drought can trigger widespread food shortages and social unrest.
630	ultimately	adv.	Ultimately, both individuals and governments must take real responsibility.
631	undergo	v.	The global energy industry has undergone major and fundamental changes.
632	unique	adj.	Every student has a unique and individual approach to learning.
633	utilise	v.	Students should actively utilise all available resources and support services.
634	valid	adj.	Provide relevant and valid evidence to support every main argument.
635	vary	v.	Individual test scores vary considerably depending on how well students prepare.
636	visible	adj.	The damaging effects of air pollution are now clearly visible in many cities.
637	vital	adj.	Access to affordable clean water is absolutely vital for human survival.
638	vulnerable	adj.	Elderly people are particularly vulnerable to the effects of extreme heat.
639	widespread	adj.	There is now widespread international concern about rising levels of air pollution.
640	accelerate	v.	New policies could significantly accelerate the shift to clean energy.

641	agreement	n.	International agreement on climate targets remains very difficult to achieve.
642	article	n.	The article argues that technology alone cannot solve climate change.
643	associated	adj.	The costs associated with climate inaction far exceed those of prevention.
644	attain	v.	Few students attain Band 8 without significant long-term preparation.
645	broaden	v.	Reading widely helps broaden your academic vocabulary considerably.
646	burden	n.	Poor communities often bear the greatest burden of environmental damage.
647	carbon	n.	Reducing carbon emissions is the most urgent global environmental priority.
648	chart	n.	The chart shows changes in energy consumption over twenty years.
649	cite	v.	Always cite your sources when using evidence in academic writing.
650	comparable	adj.	The two cities show comparable levels of urban air pollution.
651	concrete	adj.	Use concrete examples to support abstract arguments in your essay.
652	confirm	v.	The new data confirms that emissions are continuing to rise rapidly.
653	cover	v.	The study covers a broad range of social and environmental indicators.
654	critical	adj.	Critical analysis of sources is a core skill at university level.
655	dependency	n.	Fossil fuel dependency is one of the main barriers to climate progress.
656	devote	v.	She devoted several years to researching the effects of ocean acidification.
657	distribution	n.	The distribution of wealth remains deeply unequal across the globe.
658	doubt	v.	Few scientists now doubt the link between human activity and climate change.
659	engage	v.	Students who engage actively with feedback make faster progress.
660	exceed	v.	Current emissions far exceed the targets set in the Paris Agreement.
661	expertise	n.	The project required the expertise of scientists from several disciplines.
662	inform	v.	All policy decisions should always be informed by the best available evidence.
663	instance	n.	For instance, Sweden generates over half its energy from renewable sources.
664	interaction	n.	The complex interaction between human activity and the climate is important.
665	introduce	v.	The government introduced important new regulations to limit plastic use.
666	link	v.	Researchers have firmly linked poor air quality to increased rates of asthma.
667	logical	adj.	A logical argument always progresses clearly from evidence to conclusion.
668	mention	v.	The essay should clearly mention both the advantages and disadvantages.
669	minimise	v.	Good planning helps minimise errors in IELTS writing tasks.
670	occur	v.	Significant environmental damage can occur within a surprisingly short time.
671	outline	v.	Carefully outline your essay plan before you begin writing it.
672	overview	n.	The introduction should provide a brief overview of the main trends.
673	percentage	n.	The percentage of energy from renewable sources has doubled since 2010.

674	perspective	n.	A global perspective is essential when discussing climate change.
675	phrase	n.	Use a variety of academic phrases to express contrast and comparison.
676	recognise	v.	Governments are beginning to recognise the true economic cost of inaction.
677	refer	v.	Always refer back to specific data when writing your Task 1 response.
678	replace	v.	Electric vehicles will gradually replace petrol-powered cars completely.
679	shift	n.	There has been a significant cultural shift towards plant-based diets.
680	summary	n.	Write a two-sentence summary of the main trends as your introduction.
681	sustain	v.	It is very difficult to sustain economic growth without environmental damage.
682	underline	v.	Underline key words in the question before planning your response.
683	update	v.	The government pledged to update its climate targets every five years.
684	worldwide	adv.	Temperatures are rising worldwide as a direct result of greenhouse gas emissions.
685	accumulate	v.	Debt can accumulate rapidly if spending is not carefully managed.
686	alongside	prep.	Renewable energy must expand alongside improvements in overall energy efficiency.
687	appeal	v.	Sustainable travel options are beginning to appeal to a much wider audience.
688	arise	v.	Ethical questions arise when using artificial intelligence in research.
689	awareness	n.	Public awareness of environmental issues has increased significantly.
690	campaign	n.	The awareness campaign succeeded in reducing plastic bag use dramatically.
691	colleague	n.	She discussed her research findings with her colleague at the conference.
692	combination	n.	A combination of factors always contributes to academic success.
693	compile	v.	The team compiled data from multiple sources before writing the report.
694	comprehend	v.	Students must comprehend the full question before planning their answer.
695	framework	n.	An international framework is needed for consistent emissions monitoring.
696	guideline	n.	Follow the published guidelines when planning your Task 2 essay.
697	implement	v.	New environmental policies must be implemented both quickly and effectively.
698	implication	n.	The study's findings have serious and far-reaching public health implications.
699	inadequate	adj.	Wholly inadequate investment in public education severely limits development.
700	incentive	n.	Financial incentives can effectively encourage businesses to adopt green practices.
701	incorporate	v.	Strong essays always incorporate a range of relevant and up-to-date data.
702	indicator	n.	GDP alone is not a reliable indicator of a nation's overall wellbeing.
703	innovation	n.	Technological innovation is one of the most powerful drivers of economic growth.
704	interdependent	adj.	Modern national economies are becoming increasingly interdependent.

705	intervene	v.	Governments must intervene effectively to regulate harmful industries.
706	norm	n.	Household recycling is becoming the accepted norm in many developed cities.
707	accompany	v.	Parents are asked to accompany their children on the school trip.
708	adolescent	n.	Adolescents need clear guidance and consistent support at home.
709	advancement	n.	Technological advancement has transformed almost every industry.
710	advantage	n.	One advantage of learning English is access to global information.
711	advertising	n.	Advertising on social media can reach millions of people instantly.
712	agency	n.	A government agency was set up to monitor water quality.
713	announcement	n.	The school made an announcement about the change of timetable.
714	anxiety	n.	Many students experience anxiety before important exams.
715	apologise	v.	She apologised to her classmate for forgetting the project file.
716	appointment	n.	He made an appointment to see the doctor on Monday.
717	approve	v.	The school council voted to approve the new uniform policy.
718	argument	n.	The essay presented a clear and logical argument about climate change.
719	assignment	n.	Please submit your writing assignment by Friday at noon.
720	audience	n.	The audience clapped enthusiastically at the end of the presentation.
721	automation	n.	Automation is replacing many routine jobs in factories and offices.
722	availability	n.	The availability of clean water is a serious global concern.
723	bargain	n.	She found a real bargain at the second-hand bookshop.
724	biology	n.	She chose biology as one of her main subjects at school.
725	boom	n.	There was a boom in renewable energy investment last year.
726	boundary	n.	The boundary between acceptable and unacceptable behaviour must be clear.
727	broadcast	v.	The speech was broadcast live on national television and radio.
728	capability	n.	The new technology increases the capability of small research teams.
729	celebration	n.	The end-of-year celebration was enjoyed by all the students.
730	championship	n.	He won the national spelling championship last spring.
731	channel	n.	This television channel broadcasts educational programmes for students.
732	characteristic	n.	A key characteristic of good academic writing is clarity.
733	chef	n.	She trained as a chef after finishing school.
734	coastal	adj.	Coastal communities are most vulnerable to rising sea levels.
735	code	n.	Students must follow the school code of conduct at all times.
736	collective	adj.	Climate change requires a collective response from all countries.
737	committee	n.	A committee was formed to review the school's safety procedures.

738	compassion	n.	Showing compassion for others is an important human quality.
739	comprehension	n.	Reading comprehension improves with regular and varied practice.
740	compromise	n.	Both sides reached a compromise after several hours of negotiation.
741	curiosity	n.	Curiosity is one of the most valuable qualities in a learner.
742	deadline	n.	The deadline for submitting applications is the end of this month.
743	dedication	n.	Her dedication to studying every day was the key to her success.
744	determination	n.	Determination and regular practice will improve your IELTS score.
745	disappointment	n.	She felt disappointment when she missed the highest grade by one point.
746	discussion	n.	The class had an interesting discussion about the benefits of technology.
747	donation	n.	The school received a generous donation from a local business.
748	duration	n.	The duration of the exam is two hours and thirty minutes.
749	earnings	n.	Average earnings in the technology sector have risen significantly.
750	editorial	n.	The newspaper published a strong editorial criticising the new policy.

23	benefit	v.	Everyone in society genuinely benefits from cleaner air and water.
24	bias	n.	Media reports on political issues can show significant bias.
25	broad	adj.	The essay covers a broad range of important environmental issues.
26	capacity	n.	The new stadium has a capacity of over 80,000 spectators.
27	capture	v.	Photographs effectively capture important moments in history.
28	challenge	n.	Climate change is arguably the greatest challenge of our time.
29	circumstance	n.	The outcome of any situation depends on the circumstances.

30	classify	v.	Biologists classify living organisms into clearly defined groups.
31	collaborate	v.	Students learn more effectively when they collaborate on tasks.
32	commitment	n.	Success in IELTS requires commitment and consistent practice.
33	complex	adj.	The relationship between poverty and health is more complex than it appears.
34	component	n.	Protein is an essential component of a balanced diet.
35	concentrate	v.	You must concentrate carefully during the listening test.
36	concept	n.	Sustainability is one of the most important concepts in modern life.
37	conclude	v.	The report concludes that immediate action is urgently required.
38	conduct	v.	Scientists conduct experiments to test and validate their hypotheses.
39	conflict	n.	Many conflicts arise from poor communication and misunderstanding.
40	consequence	n.	Pollution has severe long-term consequences for public health.
41	consistent	adj.	A consistent study routine leads to much better exam results.
42	construct	v.	The government plans to construct several new hospitals this year.
43	consume	v.	Developed nations consume far more energy per person than developing ones.
44	context	n.	Always read a new vocabulary word carefully in its context.
45	contrast	v.	The essay contrasts the benefits of urban and rural lifestyles.
46	controversy	n.	The new energy policy caused considerable political controversy.
47	conventional	adj.	Conventional farming relies heavily on artificial fertilisers.
48	convince	v.	The scientific evidence convinced many governments to act on emissions.
49	cope	v.	Some coastal communities struggle to cope with severe flooding.
50	criteria	n.	IELTS essays are judged against four main assessment criteria.
51	decline	v.	Wild fish populations have declined sharply due to overfishing.
52	dedicate	v.	She dedicated over ten years of her career to improving literacy.
53	demonstrate	v.	The data clearly demonstrates a strong and consistent upward trend.
54	derive	v.	Many English words derive their meaning from Greek or Latin roots.
55	detect	v.	Satellites can now detect changes in forest cover from space.
56	determine	v.	A combination of factors determines a student's academic success.
57	diverse	adj.	The city has a rich and diverse multicultural population.
58	divide	v.	The country is divided into twelve administrative regions.
59	dominant	adj.	English has become the dominant language of international communication.
60	dramatic	adj.	There has been a dramatic increase in online shopping worldwide.
61	emerge	v.	Innovative solutions are beginning to emerge to tackle climate change.
62	emphasis	n.	The course places great emphasis on developing writing skills.

63	enable	v.	Digital technology enables people to work from almost anywhere.
64	encounter	v.	Students frequently encounter unfamiliar vocabulary in reading tests.
65	enforce	v.	Environmental regulations must be enforced more strictly.
66	ensure	v.	Please ensure that your essay is clearly organised before submitting.
67	establish	v.	The new policy established stricter environmental guidelines for businesses.
68	evaluate	v.	Students should evaluate both the strengths and weaknesses of arguments.
69	evolve	v.	Languages are living systems that evolve and change constantly over time.
70	exclude	v.	The study excluded participants who were below the age of eighteen.
71	expand	v.	The city has expanded dramatically in recent decades.
72	exploit	v.	Some multinational companies exploit natural resources unsustainably.
73	expose	v.	Living near industrial areas can expose residents to dangerous toxins.
74	extent	n.	The full extent of the environmental damage was not clear initially.
75	facilitate	v.	Good transport infrastructure facilitates economic growth and development.
76	feature	n.	A key feature of strong academic writing is clarity and objectivity.
77	fluctuate	v.	Global oil prices fluctuate constantly depending on supply and demand.
78	foundation	n.	A solid foundation in vocabulary is essential for IELTS success.
79	function	n.	The primary function of the graph is to illustrate long-term trends.
80	fundamental	adj.	Access to clean water is a fundamental right of every human being.
81	generate	v.	Offshore wind farms can generate large amounts of clean electricity.
82	gradually	adv.	Global average temperatures are gradually but steadily rising each decade.
83	highlight	v.	The report highlights the urgent need for investment in renewables.
84	hypothesis	n.	The researcher formulated and then tested a new scientific hypothesis.
85	identify	v.	Clearly identify the main features of the graph in your introduction.
86	illustrate	v.	This clear diagram accurately illustrates the water cycle process.
87	imply	v.	The statistical data implies that energy demand will continue to rise.
88	impose	v.	The government imposed stricter regulations on industrial carbon emissions.
89	indicate	v.	The survey clearly indicates that most people prefer living in cities.
90	inequality	n.	Economic inequality is increasing rapidly in many parts of the world.
91	inevitable	adj.	In a rapidly changing world, some degree of social change is inevitable.
92	influence	v.	Social media powerfully influences the opinions of young people.
93	infrastructure	n.	Poor infrastructure is one of the main limitations on development.
94	initiative	n.	The government launched an initiative to reduce single-use plastic.
95	insight	n.	The long-term study provides valuable insight into human behaviour.

96	integrate	v.	Schools should integrate digital technology into classroom activities.
97	interpret	v.	It is essential to interpret all data objectively and without bias.
98	investigate	v.	Researchers investigated the long-term effects of urban air pollution.
99	justify	v.	Every argument in your essay must be justified with relevant evidence.
100	labour	n.	Many industries currently face a serious shortage of skilled labour.
101	launch	v.	The company successfully launched a new range of electric vehicles.
102	maintain	v.	It is challenging to maintain a consistently balanced diet when busy.
103	mechanism	n.	Breathing is one of the most fundamental biological mechanisms of life.
104	migrate	v.	Millions of birds migrate thousands of kilometres south each winter.
105	minority	n.	All democratic societies must protect the rights of minority groups.
106	modify	v.	The research team modified the original experimental design.
107	monitor	v.	Environmental authorities continuously monitor air quality in major cities.
108	motivate	v.	Effective teachers find creative ways to motivate and inspire students.
109	objective	n.	The primary objective of the project is to reduce carbon emissions.
110	obtain	v.	International students can usually obtain a visa at the local embassy.
111	opposition	n.	The controversial policy met with strong and widespread public opposition.
112	outcome	n.	The actual outcome of the experiment was completely unexpected.
113	overcome	v.	With determination and support, students can overcome most obstacles.
114	participate	v.	All students are actively encouraged to participate in class discussions.
115	perception	n.	Our individual perception of the world is shaped by personal experience.
116	policy	n.	A clear and enforceable environmental policy is now urgently needed.
117	potential	adj.	Solar energy has enormous untapped potential as a global energy source.
118	predict	v.	Climate scientists predict that global temperatures will continue to rise.
119	priority	n.	Reducing harmful carbon emissions must now be treated as a global priority.
120	process	n.	Industrial recycling is a complex and energy-intensive multi-stage process.
121	promote	v.	The government actively promotes the wider use of sustainable transport.
122	proportion	n.	A very large proportion of global energy still comes from fossil fuels.
123	propose	v.	The lead researcher proposed an innovative and practical solution.
124	pursue	v.	After graduating, she decided to pursue a career in environmental law.
125	range	n.	A wide range of complex factors affects individual academic performance.
126	realistic	adj.	It is important to set realistic and achievable targets in study plans.
127	recommend	v.	Health experts strongly recommend reducing red meat consumption.
128	record	v.	Scientists record daily temperature changes at thousands of stations worldwide.

129	recover	v.	The national economy is slowly and gradually recovering from the recession.
130	reflect	v.	A good essay should clearly reflect the writer's original ideas.
131	reform	n.	Significant educational reform is necessary to improve student outcomes.
132	regulate	v.	Most governments strictly regulate the agricultural use of harmful pesticides.
133	reinforce	v.	Well-chosen examples effectively reinforce the central argument.
134	reject	v.	The independent committee formally rejected the controversial proposal.
135	relevant	adj.	Ensure that all the information in your essay is directly relevant.
136	rely	v.	Many rural communities rely almost entirely on subsistence agriculture.
137	represent	v.	The bar chart represents comparative data from ten different countries.
138	resource	n.	Fresh water is increasingly recognised as a precious and finite resource.
139	respond	v.	Students should respond to the exact question that has been asked.
140	restriction	n.	There are legal restrictions on the use of certain harmful chemicals.
141	reveal	v.	The large-scale survey reveals some interesting and unexpected patterns.
142	review	v.	Always carefully review your essay for grammatical errors before submitting.
143	revise	v.	You should revise all your key vocabulary notes at least once every week.
144	risk	n.	Long-term exposure to air pollution poses serious risks to human health.
145	rural	adj.	Rural communities often have access to fewer educational opportunities.
146	scale	n.	Climate change is a problem that requires action on a truly global scale.
147	scenario	n.	In the worst-case scenario, global sea levels could rise by two metres.
148	sector	n.	The renewable energy sector has been growing rapidly for the past decade.
149	simultaneously	adv.	These two complex chemical processes occur simultaneously within the cell.
150	solution	n.	There is no single simple solution to the enormous challenge of climate change.
151	specify	v.	Always specify clearly what type of graph you are describing.
152	stable	adj.	The global population remained relatively stable throughout most of the decade.
153	statistical	adj.	The report contains important and carefully analysed statistical data.
154	strategy	n.	A well-organised study strategy that includes regular revision is highly effective.
155	substitute	v.	In many recipes you can substitute butter with a healthier alternative.
156	sufficient	adj.	Is the evidence in the essay sufficient to support the conclusion?
157	sustainable	adj.	Sustainable farming practices protect the environment for future generations.
158	target	n.	The government has set a clear target to reduce carbon emissions by forty percent.
159	tension	n.	There is a growing tension between economic development and environmental conservation.

160	theory	n.	Darwin's groundbreaking theory of evolution transformed our understanding of life.
161	throughout	prep.	Average temperatures rose steadily throughout every month of the year.
162	transfer	v.	Advanced clean energy technology should be transferred to developing nations.
163	transform	v.	Digital tools are rapidly and fundamentally transforming the modern classroom.
164	transition	n.	The country is now making a challenging transition to fully renewable energy.
165	transport	n.	Efficient and affordable transport systems help reduce urban air pollution.
166	trigger	v.	Prolonged and severe drought can trigger widespread food shortages.
167	ultimately	adv.	Ultimately, individuals as well as governments must take real responsibility.
168	undergo	v.	The global energy industry has undergone major and fundamental changes.
169	unique	adj.	Every student has a unique and individual approach to learning.
170	utilise	v.	Students should actively utilise all available resources and support services.
171	valid	adj.	Provide relevant and valid evidence to support every main argument.
172	vary	v.	Individual test scores vary considerably depending on how well students prepare.
173	visible	adj.	The damaging effects of air pollution are now clearly visible in many cities.
174	vital	adj.	Access to affordable clean water is absolutely vital for human survival.
175	vulnerable	adj.	Elderly people are particularly vulnerable to the effects of extreme heat.
176	widespread	adj.	There is now widespread international concern about rising air pollution.
177	accelerate	v.	New policies could significantly accelerate the shift to clean energy.
178	affirm	v.	The new evidence affirms the link between diet and long-term health outcomes.
179	aggregate	n.	The aggregate data from all regions shows a consistent overall increase.
180	amplify	v.	Social media algorithms can rapidly amplify false or misleading information.
181	anticipate	v.	Economists widely anticipate a prolonged period of slower economic growth.
182	arbitrary	adj.	Critics argued that the selection process was arbitrary and unfair.
183	articulate	v.	Effective writers are able to articulate complex ideas with great clarity.
184	aspire	v.	Many young students aspire to study at a leading international university.
185	attribute	v.	Most climate scientists attribute the warming trend to human activity.
186	benchmark	n.	IELTS Band 7 is widely used as a benchmark for academic entry requirements.
187	biased	adj.	Media coverage of the political crisis was clearly and demonstrably biased.
188	catalyst	n.	Education acts as a powerful catalyst for economic and social change.
189	causal	adj.	Researchers identified a clear causal link between diet and disease.
190	coherent	adj.	A coherent argument is both logically organised and internally consistent.
191	coincide	v.	The severe drought coincided with an unusually warm and dry winter season.

192	commodity	n.	Clean water is an increasingly scarce and valuable commodity.
193	compensate	v.	Higher wages partially compensate workers for difficult or dangerous conditions.
194	competence	n.	Language competence is assessed across all four of the core IELTS skills.
195	comprehensive	adj.	The report provides a comprehensive overview of the main environmental issues.
196	comprise	v.	The committee comprises senior experts from over twenty countries.
197	concurrent	adj.	Two concurrent global trends are simultaneously reshaping the nature of work.
198	consensus	n.	There is now a broad international consensus on the need for climate action.
199	contradict	v.	The newly discovered evidence directly contradicts the findings of earlier studies.
200	correlate	v.	Academic achievement and early childhood nutrition tend to correlate strongly.
201	credible	adj.	Students should always use credible and peer-reviewed sources in essays.
202	cumulative	adj.	The cumulative effects of long-term environmental pollution are extremely severe.
203	debate	v.	Scholars continue to debate the underlying causes of widespread poverty.
204	deliberate	adj.	The government made a deliberate and sustained effort to reduce industrial waste.
205	deplete	v.	Fossil fuels are being depleted at an alarming and unsustainable rate.
206	deviate	v.	The final results deviate significantly from the original prediction.
207	differentiate	v.	Strong students can clearly differentiate between fact and opinion.
208	dimension	n.	The social dimension of widespread poverty is frequently overlooked.
209	diminish	v.	Global biodiversity is rapidly diminishing due to widespread habitat destruction.
210	discriminate	v.	It is both illegal and unethical to discriminate based on race or gender.
211	disparity	n.	There is a deeply troubling and growing disparity between wealthy and poor nations.
212	dynamic	adj.	Urban environments are inherently dynamic and constantly evolving over time.
213	elaborate	v.	Please elaborate on your central argument with specific and relevant examples.
214	empirical	adj.	All scientific claims should be supported by solid empirical evidence.
215	enhance	v.	The effective use of technology can significantly enhance the quality of education.
216	enumerate	v.	The detailed report enumerates the primary causes of environmental degradation.
217	equilibrium	n.	Healthy natural ecosystems maintain a complex and delicate internal equilibrium.
218	erode	v.	Coastal land is rapidly eroding as a direct consequence of rising sea levels.
219	ethical	adj.	All forms of scientific research must be governed by strict ethical guidelines.

220	evident	adj.	It is clearly evident from the available data that global emissions are rising.
221	excessive	adj.	Excessive use of smartphones has been linked to mental health problems.
222	explicit	adj.	Always provide explicit and well-supported evidence to strengthen your claims.
223	extensive	adj.	Extensive and systematic research has been conducted globally on climate change.
224	finite	adj.	Fossil fuels are finite resources and will eventually run out completely.
225	fluctuation	n.	There are significant seasonal fluctuations in annual rainfall across the region.
226	formulate	v.	National governments must urgently formulate effective long-term environmental policies.
227	fragile	adj.	Many natural ecosystems are extremely fragile and easily disturbed by human activity.
228	framework	n.	International agreements provide a formal framework for global climate action.
229	gradual	adj.	There has been a slow but gradual shift towards the use of renewable energy.
230	hierarchy	n.	A clear hierarchy of main ideas significantly improves essay cohesion.
231	identical	adj.	The two comparative graphs show nearly identical long-term trends.
232	imminent	adj.	Leading scientists warn of an imminent and potentially catastrophic climate crisis.
233	imperative	adj.	It is absolutely imperative that all governments take immediate and decisive action.
234	implement	v.	New environmental policies must be implemented both quickly and effectively.
235	implication	n.	The study's findings have serious and far-reaching implications for public health.
236	inadequate	adj.	Wholly inadequate investment in public education severely limits national development.
237	incentive	n.	Financial incentives can effectively encourage businesses to adopt green practices.
238	incorporate	v.	Strong essays always incorporate a range of relevant and up-to-date statistics.
239	indicator	n.	GDP alone is not a reliable indicator of a nation's overall wellbeing.
240	indispensable	adj.	Critical thinking is an indispensable skill in academic study.
241	inherent	adj.	There is an inherent tension between rapid economic growth and sustainability.
242	innovation	n.	Technological innovation is one of the most powerful drivers of economic growth.
243	interdependent	adj.	Modern national economies are becoming increasingly interdependent.
244	intervene	v.	Governments must intervene effectively to regulate harmful and polluting industries.
245	intrinsic	adj.	Education has intrinsic value that extends far beyond its direct economic benefits.
246	irreversible	adj.	Scientists warn that some of the most serious environmental damage is irreversible.

247	isolate	v.	The study successfully isolated the primary cause of the health problem.
248	leverage	v.	Schools can strategically leverage digital technology to significantly improve outcomes.
249	marginal	adj.	The statistical difference between the two comparison groups was only marginal.
250	methodology	n.	The study's clearly explained research methodology has been widely praised.
251	moderate	adj.	Moderate levels of regular physical exercise are highly beneficial for health.
252	neutral	adj.	All forms of academic writing should consistently maintain a neutral tone.
253	norm	n.	Household recycling is rapidly becoming the accepted norm in developed cities.
254	overlap	v.	The findings of these two independent studies overlap considerably.
255	parameter	n.	The precise parameters of the experiment were very carefully defined.
256	perceive	v.	Different individuals perceive and assess risk very differently.
257	persist	v.	The underlying problem will certainly persist unless sustained action is taken.
258	phenomenon	n.	Global warming is both a natural and a human-induced complex phenomenon.
259	plausible	adj.	The proposed argument is theoretically plausible but lacks strong evidence.
260	polarise	v.	The controversial immigration debate has deeply polarised public opinion.
261	precede	v.	Periods of significant economic decline often precede social unrest.
262	precise	adj.	Precise and carefully sourced data is essential for accurate analysis.
263	predominantly	adv.	The economy of this region is predominantly and historically agricultural.
264	premise	n.	The entire argument is constructed on a fundamentally flawed premise.
265	prevalent	adj.	Chronic non-communicable diseases are becoming increasingly prevalent.
266	prioritise	v.	Governments should clearly prioritise substantial investment in clean energy.
267	profound	adj.	Climate change will have a profound and lasting effect on human societies.
268	projection	n.	Current population projections strongly suggest that cities will grow dramatically.
269	proportional	adj.	Any response to environmental threats should be proportional to their severity.
270	qualitative	adj.	The study employs both quantitative statistical methods and qualitative case studies.
271	quantify	v.	It is inherently difficult to fully quantify the true social costs of inequality.
272	radical	adj.	A radical and fundamental change in our lifestyle is necessary to reduce emissions.
273	rationale	n.	Always provide a clear and well-argued rationale for your main argument.
274	readily	adv.	High-quality academic information is now more readily available online than ever.
275	refine	v.	The lead researcher refined the original theoretical model after initial testing.

276	replicate	v.	All scientific experiments should be independently replicable to ensure reliability.
277	resilient	adj.	Resilient communities recover more quickly and effectively from natural disasters.
278	respective	adj.	The students returned quietly to their respective assigned seats.
279	restrict	v.	Some governments attempt to restrict public access to social media.
280	retain	v.	Regularly reviewing new vocabulary is essential in order to retain it.
281	rigorous	adj.	A rigorous and transparent research methodology greatly improves academic credibility.
282	robust	adj.	The central argument of the essay is supported by robust and convincing evidence.
283	scope	n.	The scope of the research was limited by available time and financial resources.
284	scrutiny	n.	All government policies and spending decisions should be subject to close scrutiny.
285	simulate	v.	Scientists use sophisticated models to accurately simulate the effects of climate change.
286	solidarity	n.	International solidarity and cooperation are essential in addressing global poverty.
287	speculate	v.	Some researchers speculate that early diet may affect long-term memory function.
288	stark	adj.	There is a stark and deeply troubling contrast between wealthy and impoverished nations.
289	stimulate	v.	Investment in public infrastructure can powerfully stimulate long-term economic growth.
290	structural	adj.	Deep structural inequality severely limits social and economic mobility.
291	subjective	adj.	Personal opinions are inherently subjective and vary greatly between individuals.
292	subsequent	adj.	Subsequent independent research fully confirmed the validity of the initial findings.
293	subtle	adj.	There is a subtle but important distinction between the two main arguments.
294	supplement	v.	Students are encouraged to supplement their studies with additional independent reading.
295	synthesise	v.	Effective academic writers synthesise information from multiple credible sources.
296	systematic	adj.	A systematic and well-planned approach to revision consistently improves exam performance.
297	terminology	n.	All academic writing requires the use of precise and appropriate technical terminology.
298	threshold	n.	Achieving IELTS Band 7 is a very demanding and competitive threshold for many students.
299	transparent	adj.	All government financial decisions and spending should be fully transparent.

300	undermine	v.	Widespread corruption fundamentally undermines public trust in democratic institutions.
301	universal	adj.	Access to affordable clean water should be recognised as a universal human right.
302	unravel	v.	Scientists are beginning to unravel the extraordinary complexities of the human brain.
303	validate	v.	The independent results successfully validate the central hypothesis of the original study.
304	variable	n.	Temperature is the most important variable in the entire climate model.
305	viable	adj.	Solar energy is now a fully viable and cost-competitive alternative to fossil fuels.
306	yield	v.	New and improved agricultural methods consistently yield significantly higher crop outputs.
307	abbreviate	v.	You can abbreviate long titles in your essay after introducing them in full.
308	abstain	v.	She chose to abstain from voting on the controversial proposal.
309	abundant	adj.	Renewable resources are far more abundant than fossil fuels.
310	accrue	v.	Benefits accrue gradually over time through consistent and regular practice.
311	addendum	n.	The final addendum to the report addressed previously overlooked issues.
312	adjacent	adj.	The adjacent plot of land has been earmarked for a new community garden.
313	allude	v.	The researcher alludes to earlier seminal work without directly citing it.
314	ameliorate	v.	Sustained investment in public health can help ameliorate the worst effects of poverty.
315	anachronistic	adj.	Critics argue that the current regulatory framework is anachronistic and urgently needs reform.
316	analogous	adj.	This complex process is analogous to the way the human immune system functions.
317	anomaly	n.	The outlying data point was treated as a statistical anomaly and excluded from the analysis.
318	antithetical	adj.	Excessive consumerism is antithetical to the principles of sustainable development.
319	apprehension	n.	There is growing public apprehension about the long-term consequences of automation.
320	attrition	n.	Staff attrition rates were unusually and worryingly high throughout the economic recession.
321	augment	v.	Research capacity can be significantly augmented through genuine international collaboration.
322	axiom	n.	It is a widely accepted axiom in development economics that education drives progress.
323	benevolent	adj.	The charitable organisation played a genuinely benevolent role in the local community.

324	bilateral	adj.	The two neighbouring countries concluded a landmark bilateral trade agreement.
325	burgeon	v.	The renewable energy sector is burgeoning rapidly in direct response to climate pressures.
326	circumvent	v.	Some corporations attempt to circumvent environmental regulations through complex legal structures.
327	cogent	adj.	The published paper presents a cogent, well-evidenced, and logically coherent argument.
328	coherence	n.	Logical coherence is arguably the most important single feature of effective academic writing.
329	collateral	adj.	Significant collateral damage to biodiversity was an unintended consequence of the policy.
330	concomitant	adj.	Economic growth was accompanied by concomitant and troubling rises in social inequality.
331	conducive	adj.	A stable and transparent political environment is highly conducive to sustainable economic growth.
332	conjecture	n.	Without robust empirical evidence, the claim must be regarded as mere conjecture.
333	consolidate	v.	Merging overlapping departments helped significantly consolidate scarce resources and reduce costs.
334	contentious	adj.	The proposed redistribution of wealth remains a deeply contentious and divisive political issue.
335	contingent	adj.	The ultimate outcome is highly contingent upon several currently unpredictable external factors.
336	converge	v.	Multiple independent lines of research are now converging on a single compelling explanation.
337	corroborate	v.	The new findings clearly corroborate the central hypothesis that was proposed a decade ago.
338	credulous	adj.	Credulous and uncritical readers may readily accept misinformation without adequate question.
339	culminate	v.	Years of dedicated and painstaking research finally culminated in a landmark scientific publication.
340	cursory	adj.	A cursory and superficial reading of the available evidence is wholly insufficient.
341	dearth	n.	There is a notable and concerning dearth of rigorous longitudinal studies on this important topic.
342	delineate	v.	The paper carefully and precisely delineates the conceptual boundaries of the proposed framework.
343	demographic	n.	The rapidly ageing demographic presents major long-term challenges for pension and health systems.
344	derivative	adj.	Critics widely argued that the research was largely derivative and lacked genuine originality.
345	dichotomy	n.	There is a fundamentally false dichotomy between economic growth and environmental protection.

346	diffuse	v.	Information diffuses extraordinarily rapidly through large-scale social media networks worldwide.
347	discrepancy	n.	There is a significant and unexplained discrepancy between the two sets of experimental results.
348	disseminate	v.	Peer-reviewed academic journals disseminate important research findings to a global audience.
349	divergent	adj.	Deeply divergent political opinions make achieving genuine international consensus particularly difficult.
350	abolish	v.	Several countries have abolished the death penalty in recent decades.
351	absorb	v.	Forests absorb vast quantities of carbon dioxide from the atmosphere.
352	accuracy	n.	Accuracy in data presentation is essential for a high IELTS score.
353	acute	adj.	Many cities are experiencing an acute shortage of affordable housing.
354	ambivalent	adj.	Public opinion remains ambivalent on the issue of genetic engineering.
355	assimilate	v.	It takes considerable time to fully assimilate all the ideas in complex texts.
356	autonomous	adj.	Autonomous vehicles may fundamentally transform urban transportation systems.
357	broaden	v.	Reading widely helps broaden your academic vocabulary considerably.
358	carbon	n.	Carbon capture and storage may play a significant role in the energy transition.
359	chronic	adj.	Chronic underfunding of public health systems leads to consistently poor outcomes.
360	circulate	v.	Misinformation can circulate with alarming rapidity through large online networks.
361	collapse	v.	Several fragile ecosystems are at risk of collapsing under continued human pressure.
362	compelling	adj.	The documentary presents a genuinely compelling case for fundamental dietary change.
363	conceive	v.	It is hard to conceive of a prosperous world without affordable clean energy.
364	confuse	v.	Students often confuse similar academic words like affect and effect.
365	coordinate	v.	Several international agencies coordinate their efforts to tackle cross-border pollution.
366	critical	adj.	Critical analysis of sources is a core skill expected at every level of university.
367	decimate	v.	Habitat loss has decimated many native bird populations worldwide.
368	deficient	adj.	A diet chronically deficient in essential vitamins can lead to serious health problems.
369	deft	adj.	The author was remarkably deft in weaving together multiple strands of complex evidence.
370	deleterious	adj.	The deleterious long-term effects of air pollution on child development are well documented.
371	delve	v.	The doctoral thesis delves deeply into the philosophical underpinnings of environmental ethics.

372	denounce	v.	Several leading scientists publicly denounced the deliberate misrepresentation of their findings.
373	depreciate	v.	New assets can depreciate in value significantly within just a few years.
374	desist	v.	Governments must desist from subsidising the fossil fuel industries immediately.
375	discern	v.	It is possible to discern a clear and consistent pattern in the longitudinal data.
376	displace	v.	Large-scale industrial development has permanently displaced many local farming communities.
377	dissent	n.	Scientific dissent plays a valuable and important role in advancing knowledge.
378	distort	v.	Political bias and vested interests can distort the public's understanding of research.
379	efficacy	n.	The efficacy of the innovative new treatment has been confirmed by multiple studies.
380	empower	v.	Access to quality education empowers individuals to meaningfully improve their circumstances.
381	endemic	adj.	Corruption is unfortunately endemic in some poorly governed and unstable states.
382	extol	v.	The comprehensive report extols the numerous virtues of a predominantly plant-based diet.
383	facile	adj.	A facile response to a genuinely complex problem often creates further difficulties.
384	fervour	n.	The dedicated researchers approached the entire project with remarkable intellectual fervour.
385	flagrant	adj.	The company's flagrant disregard for safety regulations was widely and justifiably condemned.
386	flux	n.	The global economy is currently in a state of considerable and unpredictable flux.
387	germane	adj.	Only the most directly germane evidence should be presented in any academic argument.
388	glean	v.	Important insights can often be gleaned from careful analysis of qualitative data.
389	gratuitous	adj.	Gratuitous complexity in academic writing always obscures rather than enhances meaning.
390	harbinger	n.	A significant drop in bee populations is a troubling harbinger of ecological collapse.
391	immutable	adj.	No physical law is truly immutable; all are subject to revision and refinement.
392	impartial	adj.	An impartial and thorough review of all the evidence is essential for good policy.
393	impeccable	adj.	Her entire academic record throughout her undergraduate career was genuinely impeccable.
394	impervious	adj.	Some policymakers appear completely impervious to the evidence on environmental risk.

395	inadvertent	adj.	The inadvertent release of sensitive research data raised serious and immediate ethical concerns.
396	incentivise	v.	Governments should incentivise companies to invest heavily in sustainable practices.
397	incoherent	adj.	An incoherent and poorly structured argument will fail to persuade even sympathetic readers.
398	incorrigible	adj.	An incorrigible resistance to evidence is a serious obstacle to progress.
399	incumbent	adj.	It is incumbent upon all researchers to disclose any potential conflicts of interest.
400	indignant	adj.	Many scientists were justifiably indignant at the widespread misrepresentation of their findings.
401	inimical	adj.	Short-termism is fundamentally inimical to sustainable and responsible economic planning.
402	innocuous	adj.	What appears innocuous on the surface may have serious and far-reaching long-term consequences.
403	instigate	v.	New and compelling data instigated a complete and thorough review of the existing model.
404	lucrative	adj.	The renewable energy sector is rapidly becoming increasingly lucrative for investors.
405	malleable	adj.	Public opinion is surprisingly malleable and can be effectively shaped by media narratives.
406	mendacious	adj.	Mendacious reporting of scientific data has serious and far-reaching consequences for public policy.
407	meritocratic	adj.	A truly meritocratic education system should always reward genuine talent and effort above all else.
408	mundane	adj.	Even seemingly mundane data can reveal highly significant trends when systematically analysed.
409	nebulous	adj.	The stated policy goals were far too nebulous to be meaningfully measured or evaluated.
410	negate	v.	The compelling new evidence entirely negated the previously widely accepted theory.
411	nefarious	adj.	The nefarious and illegal activities of some corporations have caused irreparable environmental damage.
412	obdurate	adj.	Obdurate resistance to necessary change within institutions slows progress significantly.
413	obsequious	adj.	Obsequious agreement with authority is not the same as genuine intellectual engagement.
414	opaque	adj.	The opaque nature of government decision-making processes fundamentally undermines public accountability.
415	overt	adj.	There is now an overt acknowledgement of the role of human activity in climate change.
416	panacea	n.	Technology alone is not a panacea for all of society's deepest and most complex problems.

417	parochial	adj.	A parochial perspective severely limits our broader understanding of genuinely global challenges.
418	pedantic	adj.	Overly pedantic criticism of minor errors can obscure the real value of a strong argument.
419	perfunctory	adj.	A perfunctory and superficial review of the literature is wholly inadequate for serious research.
420	pervasive	adj.	The pervasive and far-reaching influence of technology on modern daily life is undeniable.
421	placate	v.	Short-term measures were hurriedly introduced to placate growing public concern.
422	plethora	n.	A plethora of peer-reviewed studies now confirms the link between diet and mental health.
423	poignant	adj.	The documentary offered a deeply poignant account of irreversible environmental destruction.
424	ponderous	adj.	A ponderous and overly dense writing style can completely obscure an interesting argument.
425	precarious	adj.	The ecological balance of the planet is in an increasingly precarious and fragile state.
426	preclude	v.	High and prohibitive costs should not preclude access to quality education for anyone.
427	prescient	adj.	The early and repeated warnings of climate scientists proved remarkably prescient.
428	prodigious	adj.	The sheer volume of data collected during the study was truly prodigious.
429	prolific	adj.	She was an exceptionally prolific researcher who published over two hundred papers.
430	propagate	v.	It is deeply irresponsible to propagate deliberate misinformation in public discourse.
431	proscribe	v.	The use of deceptive or manipulative research methods is proscribed by international guidelines.
432	quintessential	adj.	This landmark paper is the quintessential example of truly interdisciplinary academic research.
433	recalcitrant	adj.	Recalcitrant institutions are often the greatest single obstacle to meaningful educational reform.
434	rectify	v.	Urgent steps must be taken to rectify the serious damage caused by past policies.
435	redress	v.	New and comprehensive legislation aims to redress longstanding historical inequalities in education.
436	relentless	adj.	The relentless and accelerating growth of urbanisation poses major long-term sustainability challenges.
437	remonstrate	v.	Environmental activists publicly remonstrated with senior government officials over persistent inaction.
438	repudiate	v.	The entire scientific community promptly repudiated the fraudulent research.

439	residual	adj.	Some residual uncertainty about the precise rate of warming still remains among scientists.
440	resolute	adj.	A resolute and unwavering commitment to evidence-based policy is essential for effective governance.
441	reticent	adj.	Some governments remain frustratingly reticent about committing to binding emissions reduction targets.
442	reverence	n.	The groundbreaking findings were received with genuine reverence by the academic community.
443	rudimentary	adj.	A rudimentary understanding of basic statistics is essential for correctly interpreting research data.
444	sacrosanct	adj.	The fundamental principle of academic freedom should be treated as absolutely sacrosanct.
445	scepticism	n.	Healthy and principled scepticism is a fundamental virtue in all scientific inquiry.
446	scrupulous	adj.	A truly scrupulous researcher documents all data transparently, even when results are disappointing.
447	singular	adj.	The discovery was of truly singular and far-reaching importance to the entire field.
448	sobering	adj.	The very latest climate projections provide a deeply sobering reminder of the urgency of action.
449	solicit	v.	Researchers carefully solicited feedback from a broad and genuinely representative range of participants.
450	speculative	adj.	Without adequate empirical support, the central argument must be regarded as entirely speculative.
451	steadfast	adj.	A steadfast commitment to evidence is the defining mark of a reliable and credible scientist.
452	stigmatise	v.	It is both harmful and unjust to stigmatise communities based on their socioeconomic status.
453	stoic	adj.	A stoic acceptance of failure is not the same as a genuine willingness to learn.
454	strident	adj.	Strident opposition to necessary reform often delays important and ultimately beneficial change.
455	substantive	adj.	The comprehensive review produced substantive and immediately actionable recommendations for reform.
456	succumb	v.	Some species will inevitably succumb to the cumulative effects of accelerating climate change.
457	supplant	v.	Digital media is rapidly and comprehensively supplanting traditional print journalism worldwide.
458	symbiotic	adj.	There is a mutually beneficial and symbiotic relationship between scientific research and public policy.
459	temerity	n.	It requires considerable intellectual temerity to openly challenge deeply entrenched academic assumptions.
460	temperate	adj.	A temperate and carefully measured tone is always far more persuasive than emotional rhetoric.

461	tenacious	adj.	The most tenacious researchers continue to pursue their hypotheses even when results are discouraging.
462	tepid	adj.	The international political response to the crisis was widely and justifiably criticised as tepid.
463	timorous	adj.	A timorous and overly cautious approach to policy reform produces only minimal and ineffective change.
464	transient	adj.	The apparent economic recovery proved surprisingly transient and was quickly reversed.
465	trite	adj.	Trite and predictable conclusions significantly undermine the overall impact of an otherwise strong essay.
466	turbulent	adj.	The turbulent and unstable political environment made long-term strategic planning extremely difficult.
467	untenable	adj.	Under sustained scrutiny, the government's original position became politically untenable.
468	venerate	v.	Most societies tend to venerate original thinkers who challenge conventional wisdom.
469	verbose	adj.	Verbose and unnecessarily long writing often obscures rather than clarifies the central argument.
470	veracious	adj.	A veracious and honest account of the data is the absolute foundation of good science.
471	vindicate	v.	Subsequent events fully and comprehensively vindicated the original controversial policy decision.
472	visceral	adj.	The powerful documentary provoked a deeply visceral and emotional reaction from audiences worldwide.
473	vitriolic	adj.	Vitriolic and personalised public debate rarely leads to constructive or lasting policy outcomes.
474	voluminous	adj.	The voluminous and ever-growing evidence in favour of immediate climate action is impossible to ignore.
475	wane	v.	Public interest in the critical issue began to wane after the initial media attention faded.
476	warranted	adj.	The high degree of public alarm about rising pollution levels is entirely and justifiably warranted.
477	withstand	v.	Strong and resilient democratic institutions must always be able to withstand intense political pressure.
478	zealotry	n.	Zealotry, even in the service of a good cause, can ultimately undermine a movement's credibility.
479	according	adv.	According to recent research, regular reading improves writing skills significantly.
480	enthusiasm	n.	Enthusiasm for the research question is an important but not sufficient quality in a researcher.
481	feedback	n.	Constructive feedback from peer reviewers consistently improves the quality of academic work.
482	guidance	n.	Clear guidance on ethical procedures is essential for all new researchers.

483	identification	n.	The identification of the main variable was the first and most critical step.
484	imagination	n.	Scientific imagination is as important as methodological rigor in great research.
485	interpretation	n.	A careful interpretation of results avoids overstating their significance.
486	introduction	n.	The introduction should clearly state the research question and justify its significance.
487	journalism	n.	Responsible journalism plays a critical role in communicating scientific findings accurately.
488	literacy	n.	Data literacy is now a core skill required in most professional and academic contexts.
489	management	n.	Effective project management ensures that research is completed on time and within budget.
490	measurement	n.	Accurate measurement of the key variables is fundamental to any quantitative study.
491	medication	n.	The effects of the medication were carefully monitored throughout the trial.
492	narrative	n.	A coherent narrative helps readers follow the logic of a complex argument.
493	negotiation	n.	Successful negotiation between stakeholders is often necessary in applied research.
494	obligation	n.	Researchers have a professional obligation to report their findings honestly.
495	participation	n.	Active participation from all team members improved the quality of the project.
496	patience	n.	Patience is a fundamental virtue in longitudinal research.
497	persistence	n.	The persistence of the effect over time confirmed the robustness of the finding.
498	placement	n.	The placement of key information in the abstract affects the paper's visibility.
499	qualification	n.	The relevant qualification for this role is a postgraduate degree.
500	recommendation	n.	The committee's recommendation was accepted and implemented promptly.

500 words · Word · Part of Speech · Example Sentence

#	WORD	POS	EXAMPLE SENTENCE
1	abolish	v.	Several countries have abolished the death penalty in recent decades.
2	absorb	v.	Forests absorb vast quantities of carbon dioxide from the atmosphere.
3	abstract	n.	Read the abstract before deciding whether to read the full article.
4	accelerate	v.	New policies could significantly accelerate the shift to clean energy.
5	accommodate	v.	An effective curriculum must accommodate diverse learning styles.
6	accumulate	v.	Carbon dioxide gradually accumulates in the atmosphere over many decades.
7	accuracy	n.	Accuracy in data presentation is essential for a high IELTS score.
8	acute	adj.	Many cities are experiencing an acute shortage of affordable housing.
9	adjacent	adj.	The proposed development is adjacent to a protected nature reserve.
10	aggregate	n.	The aggregate data from all regions shows a consistent overall increase.
11	ambivalent	adj.	Public opinion remains ambivalent on the issue of genetic engineering.
12	amplify	v.	Social media algorithms can rapidly amplify false or misleading information.
13	anomaly	n.	The outlying data point was treated as a statistical anomaly and excluded.
14	anticipate	v.	Economists widely anticipate a prolonged period of slow economic growth.
15	arbitrary	adj.	Critics argued that the selection process was arbitrary and unfair.
16	articulate	v.	Effective writers are able to articulate complex ideas with great clarity.
17	aspire	v.	Many young students aspire to study at a leading international university.
18	attribute	v.	Most climate scientists attribute the warming trend to human activity.
19	augment	v.	Digital tools can effectively augment traditional classroom-based learning.
20	autonomous	adj.	Autonomous vehicles may fundamentally transform urban transportation systems.
21	benchmark	n.	IELTS Band 7 is widely used as a benchmark for academic entry requirements.
22	bilateral	adj.	The two neighbouring countries concluded a landmark bilateral trade agreement.
23	burgeon	v.	The renewable energy sector is burgeoning rapidly in response to climate pressures.
24	catalyst	n.	Education acts as a powerful catalyst for economic and social change.
25	causal	adj.	Researchers identified a clear causal link between diet and disease.
26	circumvent	v.	Some corporations attempt to circumvent environmental regulations through complex legal structures.
27	cogent	adj.	The paper presents a cogent, well-evidenced, and logically coherent argument.

28	coherence	n.	Logical coherence is the most important single feature of academic writing.
29	collateral	adj.	Significant collateral damage to biodiversity was an unintended consequence.
30	commodity	n.	Clean water is an increasingly scarce and valuable commodity.
31	compelling	adj.	The documentary presents a compelling case for fundamental dietary change.
32	compensate	v.	Higher wages partially compensate workers for difficult or dangerous conditions.
33	competence	n.	Language competence is assessed across all four IELTS skills.
34	comprehensive	adj.	The report provides a comprehensive overview of the main environmental issues.
35	comprise	v.	The committee comprises senior experts from over twenty countries.
36	conceive	v.	It is hard to conceive of a prosperous world without clean energy.
37	concurrent	adj.	Two concurrent global trends are simultaneously reshaping the nature of work.
38	conducive	adj.	A stable political environment is highly conducive to economic growth.
39	conjecture	n.	Without robust evidence, the claim must be regarded as mere conjecture.
40	consensus	n.	There is now a broad international consensus on the need for climate action.
41	consolidate	v.	Merging overlapping departments helped significantly consolidate scarce resources.
42	contentious	adj.	The proposed redistribution of wealth remains a deeply contentious political issue.
43	contingent	adj.	The outcome is highly contingent upon several unpredictable external factors.
44	contradict	v.	The new evidence directly contradicts the findings of earlier studies.
45	converge	v.	Multiple independent lines of research are converging on a single explanation.
46	corroborate	v.	The new findings clearly corroborate the central hypothesis proposed earlier.
47	credible	adj.	Students should always use credible and peer-reviewed sources in essays.
48	cumulative	adj.	The cumulative effects of long-term environmental pollution are extremely severe.
49	dearth	n.	There is a notable dearth of rigorous longitudinal studies on this topic.
50	delineate	v.	The paper carefully delineates the conceptual boundaries of the proposed framework.
51	demographic	n.	The rapidly ageing demographic presents major long-term challenges for pension systems.
52	derivative	adj.	Critics widely argued that the research was largely derivative and lacked originality.
53	dichotomy	n.	There is a fundamentally false dichotomy between growth and environmental protection.
54	diffuse	v.	Information diffuses rapidly through large-scale social media networks worldwide.

55	discrepancy	n.	There is a significant and unexplained discrepancy between the two sets of results.
56	disseminate	v.	Peer-reviewed journals disseminate important research findings to a global audience.
57	divergent	adj.	Deeply divergent political opinions make achieving international consensus difficult.
58	dynamic	adj.	Urban environments are inherently dynamic and constantly evolving over time.
59	elaborate	v.	Please elaborate on your central argument with specific and relevant examples.
60	elicit	v.	The survey was designed specifically to elicit honest and candid responses.
61	elucidate	v.	The professor attempted to elucidate the most complex theoretical concepts.
62	embody	v.	A democratic constitution should embody the most fundamental values of society.
63	empirical	adj.	All scientific claims should be supported by solid empirical evidence.
64	encapsulate	v.	A strong conclusion should effectively encapsulate the central argument of the essay.
65	engender	v.	Prolonged economic instability inevitably engenders widespread social anxiety.
66	enhance	v.	Technology can significantly enhance the quality of education delivery.
67	equitable	adj.	An equitable distribution of resources is central to social justice.
68	erroneous	adj.	The conclusion was based entirely on erroneous and flawed assumptions.
69	ethical	adj.	All scientific research must be governed by strict ethical guidelines.
70	evident	adj.	It is clearly evident from the data that global emissions are rising.
71	excessive	adj.	Excessive smartphone use has been linked to mental health problems.
72	exacerbate	v.	Worsening drought will significantly exacerbate the risk of food insecurity.
73	exhaustive	adj.	An exhaustive review of all relevant literature is expected in doctoral theses.
74	explicit	adj.	Always provide explicit and well-supported evidence to strengthen your claims.
75	extensive	adj.	Extensive research has been conducted globally on climate change.
76	extrapolate	v.	Researchers carefully extrapolated future trends from decades of historical data.
77	fallacy	n.	It is a fallacy to assume that economic growth always reduces poverty.
78	feasibility	n.	A detailed feasibility study was conducted before the project commenced.
79	finite	adj.	Fossil fuels are finite resources and will eventually run out completely.
80	fluctuation	n.	There are significant seasonal fluctuations in annual rainfall across the region.
81	formulate	v.	Governments must urgently formulate effective long-term environmental policies.
82	foster	v.	Education should actively foster creativity and truly independent thought.
83	fragile	adj.	Many natural ecosystems are extremely fragile and easily disturbed.

84	framework	n.	International agreements provide a formal framework for global climate action.
85	governance	n.	Effective governance is absolutely essential for achieving sustainable development goals.
86	gradual	adj.	There has been a slow but gradual shift towards renewable energy.
87	hierarchy	n.	A clear hierarchy of ideas significantly improves essay cohesion.
88	holistic	adj.	A holistic approach to health considers physical, mental, and social dimensions.
89	hypothesis	n.	The researcher formulated and then tested a new scientific hypothesis.
90	ideology	n.	Government policy is inevitably shaped by both ideology and empirical evidence.
91	imminent	adj.	Scientists are warning of an imminent and potentially catastrophic climate crisis.
92	imperative	adj.	It is absolutely imperative that all governments take immediate decisive action.
93	implement	v.	New environmental policies must be implemented quickly and effectively.
94	implication	n.	The study's findings have serious and far-reaching implications for public health.
95	inadequate	adj.	Inadequate investment in public education severely limits national development.
96	incentive	n.	Financial incentives can effectively encourage businesses to adopt green practices.
97	incorporate	v.	Strong essays incorporate a range of relevant and up-to-date statistics.
98	indicator	n.	GDP alone is not a reliable indicator of a nation's overall wellbeing.
99	indispensable	adj.	Critical thinking is an indispensable skill in academic study.
100	indigenous	adj.	Indigenous knowledge systems offer valuable insights into local ecology.
101	inherent	adj.	There is an inherent tension between rapid economic growth and sustainability.
102	innovation	n.	Technological innovation is one of the most powerful drivers of economic growth.
103	interdisciplinary	adj.	An interdisciplinary approach draws on multiple fields of specialised study.
104	intervene	v.	Governments must intervene effectively to regulate harmful and polluting industries.
105	intrinsic	adj.	Education has intrinsic value extending far beyond its direct economic benefits.
106	irreversible	adj.	Scientists warn that some serious environmental damage is already irreversible.
107	juxtapose	v.	The essay effectively juxtaposes two opposing theoretical viewpoints to illuminate the debate.
108	legitimate	adj.	There are clearly legitimate concerns about the protection of personal data.
109	lexical	adj.	A wide and sophisticated lexical range is directly rewarded in IELTS Writing.
110	lucid	adj.	A lucid explanation helps readers follow even complex arguments easily.

111	manifest	v.	The consequences of deforestation manifest as severe biodiversity collapse.
112	marginalise	v.	Economic policies that marginalise the poorest are ultimately counterproductive.
113	meticulous	adj.	The researcher was meticulous in documenting every stage of the experiment.
114	mitigate	v.	Tree-planting programmes can help significantly mitigate the effects of climate change.
115	multifaceted	adj.	Climate change is an extraordinarily multifaceted problem requiring many coordinated solutions.
116	nascent	adj.	The nascent renewable energy industry still requires substantial government support.
117	negligible	adj.	The statistical difference between the two groups was entirely negligible.
118	nuanced	adj.	This complex issue requires careful, nuanced, and contextualised analysis.
119	objectivity	n.	Rigorous academic writing demands the highest possible level of objectivity.
120	omnipresent	adj.	Digital technology has become genuinely omnipresent in every aspect of modern life.
121	paradigm	n.	The unexpected discovery led to a major paradigm shift in the entire field.
122	paradox	n.	It is a paradox that greater connectivity can lead to deeper personal isolation.
123	paramount	adj.	Complete accuracy is of paramount importance in all academic writing.
124	partisan	adj.	Openly partisan reporting significantly distorts public understanding of policy issues.
125	pedagogy	n.	Effective pedagogy is always carefully adapted to the diverse needs of individual learners.
126	permeate	v.	The effects of digital technology permeate every aspect of contemporary life.
127	perpetuate	v.	Discriminatory practices inevitably perpetuate deep-rooted social inequality.
128	pertinent	adj.	Only the most directly pertinent evidence should be included in the argument.
129	pivotal	adj.	The 2015 Paris Agreement was genuinely pivotal in global climate negotiations.
130	polarisation	n.	Growing political polarisation makes effective international cooperation increasingly difficult.
131	posit	v.	The researcher posited that early dietary patterns are the primary cause.
132	postulate	v.	Classical economists postulate that free markets tend naturally towards equilibrium.
133	pragmatic	adj.	A pragmatic solution carefully balances idealism with real-world practical constraints.
134	prevalent	adj.	Chronic non-communicable diseases are becoming increasingly prevalent worldwide.
135	prioritise	v.	Governments should clearly prioritise substantial investment in affordable clean energy.
136	profound	adj.	Climate change will have a profound and lasting effect on human societies.
137	projection	n.	Current population projections suggest that cities will grow dramatically.

138	qualitative	adj.	Qualitative research explores meaning and experience rather than statistical patterns.
139	quantitative	adj.	Quantitative methods allow for precise statistical comparison and generalisation.
140	radical	adj.	A radical change in lifestyle is necessary to reduce carbon emissions.
141	rationale	n.	Always provide a clear and well-argued rationale for your main argument.
142	reductive	adj.	A reductive analysis inevitably misrepresents genuinely complex phenomena.
143	relegate	v.	Environmental concerns have been consistently relegated to the margins of the policy debate.
144	resilient	adj.	Resilient communities generally recover more quickly from natural disasters.
145	restrict	v.	Some governments attempt to restrict public access to social media.
146	rigorous	adj.	A rigorous research methodology greatly improves academic credibility.
147	robust	adj.	The argument is well supported by robust and convincing evidence.
148	scope	n.	The scope of the research was limited by available time and resources.
149	scrutiny	n.	All government policies and spending should be subject to close public scrutiny.
150	simulate	v.	Scientists use sophisticated models to simulate the effects of climate change.
151	solidarity	n.	International solidarity is essential in effectively addressing global poverty.
152	speculate	v.	Some researchers speculate that early diet significantly affects long-term memory.
153	stark	adj.	There is a stark contrast between wealthy and impoverished nations.
154	stimulate	v.	Investment in public infrastructure can powerfully stimulate long-term economic growth.
155	structural	adj.	Deep structural inequality severely limits social and economic mobility.
156	subjective	adj.	Personal opinions are inherently subjective and vary greatly between individuals.
157	subsequent	adj.	Subsequent independent research fully confirmed the validity of the initial findings.
158	subtle	adj.	There is a subtle but important distinction between the two main arguments.
159	supplement	v.	Students are encouraged to supplement their studies with additional independent reading.
160	synthesise	v.	Effective academic writers synthesise information from multiple credible sources.
161	systematic	adj.	A systematic approach to revision consistently improves exam performance.
162	terminology	n.	All academic writing requires the use of precise and appropriate technical terminology.
163	threshold	n.	Crossing the critical two-degree threshold could trigger irreversible climate change.
164	transparent	adj.	Genuinely transparent governance always helps build sustainable public trust.

165	undermine	v.	Widespread corruption fundamentally undermines public trust in democratic institutions.
166	universal	adj.	Access to clean water should be recognised as a universal human right.
167	validate	v.	Peer review is the scientific process used to validate all new research findings.
168	variable	n.	Temperature is the most important variable in the entire climate model.
169	viable	adj.	Solar energy is now a fully viable alternative to fossil fuels.
170	wane	v.	Public interest in the issue began to wane after the initial media attention faded.
171	warranted	adj.	The urgency expressed by the scientific community is entirely warranted.
172	withstand	v.	Strong democratic institutions must be able to withstand intense political pressure.
173	yield	v.	New agricultural methods consistently yield significantly higher crop outputs.
174	abdicate	v.	Leaders must not abdicate their responsibility to act on climate change.
175	aberrant	adj.	The aberrant data point was removed before the final statistical analysis.
176	accentuate	v.	The report accentuates the widening inequality gap between rich and poor nations.
177	acrimonious	adj.	The policy debate became acrimonious as neither side was willing to compromise.
178	adhere	v.	All participants must adhere strictly to the published ethical guidelines.
179	adjudicate	v.	An independent panel of experts will adjudicate the complex legal dispute.
180	admonish	v.	The committee admonished the agency for its persistent lack of transparency.
181	ameliorate	v.	Sustained investment in public health can ameliorate the worst effects of poverty.
182	anachronistic	adj.	Critics argue that the current regulatory framework is anachronistic and needs reform.
183	analogous	adj.	This process is analogous to the way the human immune system functions.
184	antithetical	adj.	Excessive consumerism is antithetical to the principles of sustainable development.
185	apprehension	n.	There is growing public apprehension about the consequences of automation.
186	assimilate	v.	It takes considerable time to fully assimilate complex theoretical frameworks.
187	attrition	n.	Staff attrition rates were unusually high throughout the economic recession.
188	axiom	n.	It is a widely accepted axiom in development economics that education drives progress.
189	benevolent	adj.	The charitable organisation played a genuinely benevolent role in the local community.
190	chronic	adj.	Chronic underfunding of public health systems consistently leads to poor outcomes.
191	circulate	v.	Misinformation can circulate with alarming rapidity through large online networks.

192	collapse	v.	Several fragile ecosystems are at risk of collapsing under continued human pressure.
193	concomitant	adj.	Economic growth was accompanied by concomitant rises in social inequality.
194	coordinate	v.	Several international agencies coordinate their efforts to tackle cross-border pollution.
195	credulous	adj.	Credulous readers may readily accept misinformation without adequate critical questioning.
196	culminate	v.	Years of dedicated research finally culminated in a landmark scientific publication.
197	cursory	adj.	A cursory reading of the available evidence is wholly insufficient for analysis.
198	deduce	v.	Researchers can deduce important patterns from the careful analysis of large datasets.
199	deliberate	adj.	The government made a deliberate and sustained effort to reduce industrial waste.
200	deplete	v.	Fossil fuels are being depleted at an alarming and unsustainable rate worldwide.
201	deviate	v.	The final results deviate significantly and unexpectedly from the original prediction.
202	diminish	v.	Global biodiversity is rapidly diminishing due to widespread habitat destruction.
203	discriminate	v.	It is both illegal and unethical to discriminate based on race or gender.
204	disparity	n.	There is a deeply troubling and growing disparity between wealthy and poor nations.
205	displace	v.	Large-scale development has permanently displaced many local farming communities.
206	dogmatic	adj.	A rigidly dogmatic approach to policy consistently ignores contrary evidence.
207	empiricism	n.	Empiricism holds that all genuine knowledge must be grounded in observable evidence.
208	epistemology	n.	Epistemology is the philosophical study of what constitutes knowledge.
209	erode	v.	Coastal land is rapidly eroding as a direct consequence of rising sea levels.
210	esoteric	adj.	The highly esoteric nature of the paper's content severely limited its readership.
211	exonerate	v.	Newly discovered evidence completely exonerated the researcher of any wrongdoing.
212	expedite	v.	Digital tools can greatly expedite the time-consuming process of data collection.
213	fallacious	adj.	The argument is weakened by a number of clearly fallacious assumptions.
214	formidable	adj.	The challenge of genuinely reversing the effects of climate change is formidable.
215	fragmented	adj.	A highly fragmented policy framework significantly reduces overall effectiveness.
216	granular	adj.	A granular analysis of the data reveals patterns invisible at the macro level.

217	groundbreaking	adj.	The study's findings were widely described as truly groundbreaking by experts.
218	hegemony	n.	Cultural hegemony can systematically suppress minority voices and perspectives.
219	homogenise	v.	Globalisation tends to progressively homogenise diverse cultural practices.
220	hyperbole	n.	Political speeches frequently rely on deliberate hyperbole to stir strong emotions.
221	iconoclast	n.	The iconoclastic researcher challenged many firmly accepted theoretical assumptions.
222	imperialism	n.	Economic imperialism can undermine the sovereignty of weaker developing nations.
223	impetus	n.	The unexpected discovery provided the critical impetus for new research.
224	inaccessible	adj.	Dense technical jargon can render academic texts largely inaccessible to non-specialists.
225	incisive	adj.	The journal article offers a remarkably incisive critique of current education policy.
226	inextricable	adj.	Poverty and poor health are inextricably and deeply linked in complex ways.
227	infer	v.	What can we legitimately infer from the limited data presented in the graph?
228	insidious	adj.	The insidious and cumulative effects of misinformation accumulate over time.
229	interdependent	adj.	Modern national economies are becoming increasingly interdependent and interconnected.
230	leverage	v.	Schools can strategically leverage digital technology to significantly improve outcomes.
231	mandate	v.	The updated legislation mandates the use of appropriate safety equipment at all times.
232	marginal	adj.	The statistical difference between the two comparison groups was only marginal.
233	methodology	n.	The study's clearly explained research methodology has been widely praised.
234	moderate	v.	A neutral third party was appointed to moderate the highly sensitive negotiations.
235	neutral	adj.	All academic writing should consistently maintain a neutral and objective tone.
236	norm	n.	Household recycling is rapidly becoming the accepted norm in developed cities.
237	normative	adj.	The report makes explicit normative claims about what governments have a duty to do.
238	obfuscate	v.	Unnecessarily dense jargon can obfuscate rather than clarify a complex argument.
239	ontological	adj.	The research raises fundamental ontological questions about the nature of knowledge.
240	ostensibly	adv.	The controversial policy was ostensibly introduced to protect consumer interests.

241	overlap	v.	The findings of these two independent studies overlap considerably in their conclusions.
242	parameter	n.	The precise parameters of the experiment were very carefully defined by the researchers.
243	perceive	v.	Different individuals perceive and assess risk very differently based on experience.
244	persist	v.	The underlying problem will certainly persist unless meaningful action is taken.
245	phenomenon	n.	Global warming is both a natural and a human-induced complex phenomenon.
246	plausible	adj.	The proposed argument is theoretically plausible but lacks sufficiently strong evidence.
247	polarise	v.	The controversial immigration debate has deeply polarised public opinion.
248	precede	v.	Periods of significant economic decline often precede serious social unrest.
249	precise	adj.	Precise and carefully sourced data is essential for accurate analysis.
250	predominantly	adv.	The economy of this particular region is predominantly and historically agricultural.
251	premise	n.	The entire argument is constructed on a fundamentally flawed and unsupported premise.
252	proponent	n.	She is widely regarded as one of the most influential proponents of evidence-based policy.
253	proliferate	v.	Social media platforms have proliferated with extraordinary and unprecedented speed.
254	proportional	adj.	Any response to environmental threats should be proportional to their severity.
255	provoke	v.	The controversial study provoked significant debate across academic circles.
256	reify	v.	Language can subtly reify social distinctions and make arbitrary categories seem natural.
257	replicate	v.	All scientific experiments should be independently replicable to ensure reliability.
258	respective	adj.	The students returned quietly to their respective assigned seats.
259	retain	v.	Regularly reviewing new vocabulary is essential in order to retain it.
260	scrutinise	v.	The committee agreed to scrutinise all new evidence before revising its recommendations.
261	sequence	n.	A strong IELTS essay follows a clear and logical sequence of ideas.
262	substantive	adj.	The comprehensive review produced substantive and actionable recommendations for reform.
263	succumb	v.	Some species will inevitably succumb to the cumulative effects of climate change.
264	supplant	v.	Digital media is rapidly and comprehensively supplanting traditional print journalism.
265	symbiotic	adj.	There is a mutually beneficial and symbiotic relationship between research and policy.

266	temerity	n.	It requires considerable temerity to openly challenge deeply entrenched academic assumptions.
267	temperate	adj.	A temperate and carefully measured tone is always far more persuasive than rhetoric.
268	tenacious	adj.	The most tenacious researchers continue to pursue their hypotheses even when results are discouraging.
269	tepid	adj.	The international political response to the crisis was widely criticised as tepid.
270	transient	adj.	The apparent economic recovery proved surprisingly transient and was quickly reversed.
271	turbulent	adj.	The turbulent political environment made long-term strategic planning extremely difficult.
272	untenable	adj.	Under sustained scrutiny, the government's original position became politically untenable.
273	verbose	adj.	Verbose writing often obscures rather than clarifies the central argument.
274	vindicate	v.	Subsequent events fully and comprehensively vindicated the original policy decision.
275	vitriolic	adj.	Vitriolic public debate rarely leads to constructive or lasting policy outcomes.
276	voluminous	adj.	The voluminous evidence in favour of immediate climate action is impossible to ignore.
277	zealotry	n.	Zealotry, even in the service of a good cause, can undermine a movement's credibility.
278	abrogate	v.	The government moved swiftly to abrogate the outdated and wholly ineffective treaty.
279	abeyance	n.	The controversial development plans were held in abeyance pending further detailed review.
280	affinity	n.	There is a clear and compelling affinity between linguistic ability and academic writing performance.
281	allay	v.	Clearer and more transparent communication from authorities significantly helped to allay widespread public fears.
282	approbation	n.	The groundbreaking study received widespread and warm approbation from the entire academic community.
283	arcane	adj.	The highly arcane and specialised nature of the research severely limited its wider accessibility to non-specialists.
284	assiduous	adj.	Her notably assiduous and systematic approach to reviewing all available literature genuinely set her important work apart.
285	belabour	v.	There is little scholarly value in continuing to belabour a point that has already been firmly and fully established.
286	byzantine	adj.	The unnecessarily byzantine and complex regulatory framework consistently frustrated even the most highly experienced practitioners.
287	cacophony	n.	The competing and wholly irreconcilable voices in the ongoing policy debate created an utterly bewildering cacophony of contradictory claims.
288	capitulate	v.	Under intense and sustained public and media pressure, the government eventually and somewhat reluctantly capitulated to the demands.

289	caustic	adj.	The caustic and sharply worded editorial drew considerable and entirely deserved attention to the government's persistent environmental failures.
290	clandestine	adj.	The deliberately clandestine and secretive nature of the sensitive ongoing negotiations significantly and predictably undermined subsequent public trust.
291	coalesce	v.	Multiple previously separate and divergent research streams are now beginning to slowly but clearly coalesce into a single unified theoretical model.
292	compunction	n.	The corporation showed absolutely no compunction whatsoever in systematically and consistently prioritising short-term profit over all other environmental considerations.
293	contrite	adj.	A genuinely and sincerely contrite public acknowledgement of all past failures is entirely essential for successfully rebuilding lasting public trust.
294	diffidence	n.	Her characteristic and somewhat surprising diffidence entirely and misleadingly belied the sheer breadth and considerable depth of her scholarly expertise.
295	disinterested	adj.	All truly serious and credible scientific inquiry should ideally and always be conducted only by fully disinterested and genuinely impartial researchers.
296	ebullient	adj.	The research team was genuinely and infectiously ebullient and excited following the wholly unexpected and scientifically highly significant discovery.
297	edifice	n.	The entire complex and outdated legislative edifice currently underpinning existing environmental law now urgently and comprehensively requires fundamental and radical reform.
298	egregious	adj.	The comprehensive and wide-ranging independent report documented several truly egregious and wholly inexcusable violations of all fundamental and internationally recognised environmental regulations.
299	extol	v.	The comprehensive and detailed policy report warmly and enthusiastically extols the numerous and very well-documented environmental virtues of a predominantly plant-based diet.
300	facile	adj.	An insufficiently rigorous and facile response to a genuinely complex and multifaceted problem almost invariably and predictably creates yet further and worse difficulties.
301	fervour	n.	The dedicated and clearly passionate research team approached the entire ambitious and intellectually challenging project with remarkable and sustained intellectual fervour throughout.
302	flagrant	adj.	The corporation's flagrant and wholly inexcusable disregard for clearly established and internationally recognised safety regulations was very widely and entirely justifiably condemned.
303	germane	adj.	Only the most directly germane and highly relevant evidence should ever be carefully and judiciously selected and presented in any serious academic argument.
304	harbinger	n.	A significant and worryingly precipitous drop in global bee populations is widely regarded as a deeply alarming and unmistakable harbinger of ecological collapse.
305	immutable	adj.	No physical or scientific law is truly immutable or entirely beyond possible revision; all scientific knowledge remains permanently subject to potential refinement.
306	impartial	adj.	A genuinely impartial and truly thorough review of all the available evidence is an absolute and non-negotiable scientific necessity for credible research.

307	impeccable	adj.	Her entire academic record throughout her distinguished and highly productive undergraduate career was genuinely and almost universally regarded as truly impeccable.
308	impervious	adj.	Some key and highly influential policymakers appear entirely and dangerously impervious to the overwhelming and well-documented weight of scientific evidence on environmental risks.
309	inadvertent	adj.	The inadvertent and entirely accidental release of highly sensitive research data immediately raised very serious and pressing legal and ethical concerns.
310	incongruent	adj.	The wholly anomalous and completely unexpected result was entirely incongruent with all of the previous experimental findings in the literature.
311	indeterminate	adj.	The precise long-term outcome of the complex and multi-faceted policy intervention remains stubbornly and frustratingly indeterminate at this early stage.
312	internalise	v.	Students must deeply and thoroughly internalise all key grammatical rules and essential structures for truly accurate and genuinely fluent language production.
313	lucrative	adj.	The rapidly expanding and increasingly competitive renewable energy sector is rapidly becoming both increasingly lucrative and highly attractive for all long-term investors.
314	malleable	adj.	Public opinion on this genuinely complex issue is surprisingly and perhaps worryingly malleable and can be very effectively shaped and influenced by sustained media narratives.
315	mendacious	adj.	The deliberate and clearly calculated mendacious and systematic misrepresentation of key scientific data has very serious and far-reaching consequences for all sound public policy.
316	meritocratic	adj.	A truly and genuinely meritocratic education system should always and very consistently reward genuine intellectual talent and all forms of sustained and serious hard work.
317	mundane	adj.	Even seemingly mundane and entirely unremarkable data can reveal highly significant and important underlying patterns when very carefully and systematically analysed.
318	nefarious	adj.	The well-documented nefarious and illegal activities of certain large and powerful corporations have caused truly irreparable and long-lasting environmental damage.
319	obdurate	adj.	Deeply obdurate and stubbornly resistant institutional inertia consistently and very significantly slows down all truly important and urgently needed progress.
320	obsequious	adj.	Obsequious and completely uncritical agreement with established authority is fundamentally and importantly distinct from any form of genuine and properly considered intellectual engagement.
321	overt	adj.	There is now a clear and entirely overt public acknowledgement of the direct and undeniable causal role of human activity in driving dangerous climate change.
322	panacea	n.	Technology alone is definitely and demonstrably not a complete or sufficient panacea for all of society's deepest, most complex, and most persistent structural problems.

323	parochial	adj.	A narrow and fundamentally parochial perspective severely and unnecessarily limits our broader and more nuanced understanding of genuinely complex and interconnected global challenges.
324	pedantic	adj.	Overly pedantic and unnecessarily detailed criticism of minor textual errors can very easily and fatally obscure the genuine intellectual value and insight of a strong argument.
325	perfunctory	adj.	A wholly perfunctory and merely superficial review of the available literature is entirely and completely inadequate for any form of serious and credible academic research.
326	placate	v.	Short-term and largely cosmetic and ultimately ineffective measures were hastily and cynically introduced specifically to placate rapidly growing and highly vocal public concern.
327	plethora	n.	A substantial and rapidly growing plethora of peer-reviewed and highly credible scientific studies now very consistently confirms the direct and important link between diet and mental health.
328	ponderous	adj.	A ponderous and unnecessarily dense and convoluted academic writing style can completely and fatally obscure even a genuinely interesting and potentially important underlying argument.
329	precarious	adj.	The overall ecological balance of our fragile and interconnected planet is now in an increasingly precarious and genuinely deeply concerning state.
330	preclude	v.	Prohibitively high financial costs and other entrenched structural barriers should absolutely never preclude any deserving individual from accessing all forms of quality education.
331	prescient	adj.	The early, repeated, and very widely ignored warnings of leading climate scientists have ultimately and completely proved to be remarkably and impressively prescient.
332	prodigious	adj.	The sheer volume and breadth of primary data carefully collected throughout the entire ambitious and wide-ranging study was genuinely and truly prodigious.
333	prolific	adj.	She was an exceptionally prolific, genuinely innovative, and very widely respected researcher who published more than two hundred peer-reviewed papers throughout her career.
334	propagate	v.	It is both deeply irresponsible and genuinely and seriously harmful to deliberately and knowingly propagate dangerous misinformation in any form of public discourse.
335	proscribe	v.	The use of deliberately deceptive or systematically manipulative research methods is very firmly and entirely unambiguously proscribed by all major international ethical guidelines.
336	quintessential	adj.	This truly landmark and very widely cited paper is justifiably and universally regarded as the quintessential and finest example of genuinely interdisciplinary academic research.
337	recalcitrant	adj.	Deeply recalcitrant and stubbornly resistant institutions and organisations are consistently and demonstrably the single greatest obstacle to all meaningful and lasting educational reform.
338	rectify	v.	Urgent, comprehensive, and decisive steps must be taken immediately to fully and permanently rectify the very serious damage caused by a long and costly series of past policy failures.

339	redress	v.	Important new and comprehensive legislation now specifically and ambitiously aims to fully redress longstanding, deeply entrenched, and widely acknowledged historical inequalities in educational access.
340	relentless	adj.	The relentless, unceasing, and rapidly accelerating growth of global urbanisation poses formidable, complex, and genuinely urgent long-term sustainability challenges.
341	remonstrate	v.	Environmental activists publicly, passionately, and very consistently remonstrated with senior government officials over their persistent, inexcusable, and ultimately deeply damaging environmental inaction.
342	repudiate	v.	The entire united scientific community promptly and unanimously repudiated the obviously fraudulent and entirely fabricated research findings presented at the conference.
343	resolute	adj.	A truly resolute and entirely unwavering personal commitment to fully evidence-based policy is absolutely essential for genuinely effective and publicly trustworthy governance.
344	reticent	adj.	Some key and highly influential governments remain stubbornly and very frustratingly reticent about making any meaningful commitments to fully binding international emissions reduction targets.
345	reverence	n.	The truly extraordinary and widely significant findings were universally received with genuine reverence and deep admiration by the entire global academic community.
346	sacrosanct	adj.	The fundamental, widely accepted, and enormously important principle of academic freedom should always and without any exception be treated as absolutely and non-negotiably sacrosanct.
347	scrupulous	adj.	A truly scrupulous and intellectually honest researcher always and consistently documents all data fully and transparently, even and especially when the results are profoundly disappointing.
348	singular	adj.	The remarkable and entirely unexpected discovery was immediately recognised as being of truly singular and profoundly far-reaching importance to the entire academic and scientific field.
349	solicit	v.	The experienced researchers carefully and very systematically solicited detailed and candid feedback from a genuinely broad and fully representative range of carefully selected diverse participants.
350	steadfast	adj.	A steadfast, principled, and entirely unwavering personal and professional commitment to rigorous empirical evidence is the defining and essential mark of a truly reliable scientist.
351	stigmatise	v.	It is both deeply harmful and profoundly unjust to stigmatise or unfairly discriminate against entire communities on the basis of their socioeconomic status or background.
352	strident	adj.	Strident, uncompromising, and inflexible opposition to genuinely necessary and beneficial reform too often and unnecessarily delays fundamentally important and ultimately positive change.
353	timorous	adj.	A timorous, overly cautious, and fundamentally risk-averse approach to genuinely essential policy reform consistently and predictably produces only minimal and wholly ineffective change.
354	venerate	v.	Most intellectually open, pluralist, and genuinely progressive societies actively tend to venerate original and courageous thinkers who bravely challenge accepted conventional wisdom.

355	nebulous	adj.	The government's nebulous targets made accountability very difficult.
356	pervasive	adj.	The pervasive use of smartphones has transformed social interaction.
357	poignant	adj.	The documentary included several poignant accounts from affected families.
358	scepticism	n.	Healthy scepticism is essential when evaluating sources of information.
359	sobering	adj.	The statistics on global poverty are genuinely sobering.
360	speculative	adj.	The investment was entirely speculative and carried significant risk.
361	stoic	adj.	The stoic response of local communities to the disaster was remarkable.
362	egalitarian	adj.	A truly egalitarian education system gives every child an equal opportunity.
363	elusive	adj.	A truly satisfactory solution to the problem has so far proven frustratingly elusive.
364	equivocal	adj.	The overall evidence on this important point remains equivocal and genuinely inconclusive.
365	erudite	adj.	The erudite professor explained even the most complex concepts with admirable clarity.
366	forsake	v.	Society must not forsake long-term environmental sustainability for short-term economic gains.
367	frugal	adj.	A genuinely frugal approach to resource use is absolutely central to sustainable living.
368	hallmark	n.	Precision of language is widely regarded as the hallmark of strong academic writing.
369	heterogeneous	adj.	A more heterogeneous sample would be far more representative of the wider population.
370	heuristic	adj.	A heuristic approach allows researchers to solve complex problems through practical experimentation.
371	homogeneous	adj.	The study sample was too homogeneous to be truly representative.
372	intransigent	adj.	Intransigent political opposition significantly delayed the passage of essential environmental legislation.
373	irrefutable	adj.	The evidence against the continued widespread use of fossil fuels is now irrefutable.
374	judicious	adj.	A judicious and careful selection of reliable sources greatly strengthens any academic argument.
375	latent	adj.	There is enormous latent potential in many underserved communities that education can unlock.
376	laud	v.	The groundbreaking study was widely lauded by experts for its rigorous and innovative methodology.
377	efficacious	adj.	The intervention proved efficacious across a wide range of demographic subgroups.
378	acumen	n.	Her academic acumen and business insight made her a valued consultant.
379	adamant	adj.	The lead researcher was adamant that the methodology was entirely valid.
380	adroit	adj.	She was adroit at navigating the complex politics of her field.

381	altruistic	adj.	Genuinely altruistic motivations are rare in highly competitive environments.
382	ambivalence	n.	There is considerable ambivalence among academics about AI in education.
383	anomalous	adj.	The anomalous findings were eventually explained by a calibration error.
384	antagonistic	adj.	An antagonistic tone in academic debate rarely advances understanding.
385	apathy	n.	Public apathy about political issues remains a major democratic challenge.
386	apposite	adj.	She chose an apposite quotation that perfectly illustrated her argument.
387	ardent	adj.	He was an ardent advocate for open-access academic publishing.
388	arduous	adj.	The process of longitudinal data collection was arduous but ultimately rewarding.
389	attest	v.	Multiple independent studies attest to the seriousness of the biodiversity crisis.
390	audacity	n.	It takes intellectual audacity to challenge widely accepted paradigms.
391	austerity	n.	Years of austerity had severely depleted investment in public infrastructure.
392	avarice	n.	Corporate avarice has too often been prioritised over environmental responsibility.
393	avert	v.	Bold and immediate policy action could yet avert the worst climate outcomes.
394	avid	adj.	An avid reader of the latest journals, she was always ahead of her peers.
395	banal	adj.	A banal conclusion suggests that the writer has not engaged deeply with the topic.
396	belie	v.	The simplicity of the model belied the profound complexity of the underlying system.
397	bolster	v.	Additional case studies would significantly bolster the main argument.
398	candid	adj.	A candid acknowledgement of limitations always strengthens academic credibility.
399	candour	n.	The report was praised for its intellectual candour and honesty.
400	categorical	adj.	We cannot yet make categorical claims without more robust evidence.
401	causality	n.	Establishing causality, rather than correlation, is the key challenge here.
402	caveat	n.	The author added an important caveat about the generalisability of the findings.
403	circumspect	adj.	Researchers should be circumspect when interpreting early-stage results.
404	coerce	v.	Participants must never be coerced into taking part in any research study.
405	cohesion	n.	The essay lacks cohesion — the ideas do not connect smoothly between paragraphs.
406	commensurate	adj.	The level of funding should be commensurate with the scale of the proposed work.
407	concede	v.	Even the most sceptical reviewers were eventually forced to concede the point.
408	confound	v.	Multiple confounding variables complicated the interpretation of the results.
409	conscientious	adj.	A conscientious researcher always checks data for errors before drawing conclusions.

410	constrain	v.	Limited funding severely constrained the scope of the fieldwork.
411	controversial	adj.	The publication of the controversial findings sparked an immediate global debate.
412	counterintuitive	adj.	The counterintuitive results led to a thorough re-examination of the model.
413	credence	n.	The new data lends considerable credence to the previously contested hypothesis.
414	cynicism	n.	Healthy cynicism towards extraordinary claims is a virtue in scientific inquiry.
415	debunk	v.	The paper systematically debunked several long-standing misconceptions in the field.
416	diligent	adj.	Diligent and consistent revision of vocabulary is the most effective study habit.
417	discern	v.	It is possible to discern a consistent pattern across all five datasets.
418	dissent	n.	Genuine scientific dissent plays a vital role in preventing intellectual stagnation.
419	distort	v.	Political pressure and vested financial interests can significantly distort public understanding of research.
420	divisive	adj.	The divisive nature of the ongoing debate has made it extremely difficult to achieve any consensus.
421	dogma	n.	Scientific dogma, however well-established, must always remain open to rigorous critical scrutiny.
422	dormant	adj.	Dormant environmental risks can become suddenly critical if preventative safeguards are removed.
423	dubious	adj.	The methodology of the original study was widely regarded as dubious and methodologically unreliable.
424	duplicity	n.	Any form of duplicity in the reporting of research data constitutes a serious breach of academic ethics.
425	eclectic	adj.	Her eclectic research methodology drew productively on methods from several different academic disciplines.
426	edify	v.	The primary purpose of academic publication is ultimately to edify and advance our collective knowledge.
427	eminent	adj.	The paper was authored jointly by two of the most eminent and widely respected researchers in the entire field.
428	empower	v.	Access to quality education fundamentally empowers individuals to meaningfully improve their own circumstances.
429	enigmatic	adj.	The enigmatic and puzzling results of the initial experiment prompted a much more extensive follow-up study.
430	ephemeral	adj.	The positive impact of poorly designed short-term interventions is often disappointingly ephemeral and quickly reversed.
431	equanimity	n.	The most effective researchers consistently approach unexpected setbacks with genuine equanimity and resilience.
432	errant	adj.	The errant methodology in the original study inevitably led to seriously misleading and unreliable conclusions.
433	esteem	n.	She was widely and consistently held in the highest professional esteem by all her colleagues.

434	evade	v.	Some powerful corporations continue to evade meaningful regulatory accountability for their serious environmental impact.
435	evoke	v.	The powerful and carefully designed visual data immediately evoked a strong and immediate response from the wider public.
436	exacting	adj.	The exacting and uncompromising standards of the peer review process ensure the quality of all published academic research.
437	exemplify	v.	This carefully designed study effectively exemplifies all the best practices in rigorous clinical research design.
438	expedient	adj.	An expedient and short-term solution that deliberately ignores root causes will rarely produce genuine and lasting improvement.
439	exponent	n.	She was widely regarded as the most prominent and influential exponent of an evidence-based approach to education policy.
440	fabricate	v.	The researcher was found to have deliberately fabricated key data points in their previously celebrated study.
441	facilitate	v.	Well-designed public transport infrastructure effectively facilitates broader economic growth and development.
442	fallible	adj.	All researchers are inherently fallible, which is precisely why rigorous and independent peer review remains so important.
443	fastidious	adj.	A fastidious and meticulous approach to all aspects of data collection is the hallmark of truly excellent research.
444	ferment	n.	The new and unexpected findings created considerable and wide-ranging intellectual ferment across the academic community.
445	fervent	adj.	She was a fervent and passionate lifelong advocate for open-access academic publishing throughout her career.
446	finesse	n.	Handling the sensitive and complex ethical dimensions of the study required considerable intellectual finesse and care.
447	foment	v.	Deliberate and calculated misinformation can effectively foment dangerous public distrust in genuinely important scientific findings.
448	forthright	adj.	A forthright and fully transparent account of all significant methodological limitations is always professionally expected.
449	fragility	n.	The fragility of the complex and interconnected ecosystem was not fully appreciated until irreversible damage had already been done.
450	futile	adj.	Without significant and sustained political will, isolated efforts to meaningfully reverse climate change will ultimately prove futile.
451	garner	v.	The innovative and well-designed study successfully managed to garner significant and widespread international academic attention and acclaim.
452	gravity	n.	The genuine gravity of the escalating climate crisis demands an immediate and thoroughly unprecedented coordinated policy response.
453	hamper	v.	Inadequate and inconsistent research funding can significantly and seriously hamper the quality and scope of important and valuable research.
454	hubris	n.	Intellectual hubris, or excessive and unjustified confidence in one's own preferred theories, remains a serious and pervasive risk in academia.
455	illuminate	v.	This elegantly and precisely designed study effectively illuminates the previously poorly understood relationship between diet and cognition.

456	impose	v.	The regulatory authority imposed much stricter and more comprehensive regulations on industrial carbon emissions.
457	inadmissible	adj.	Evidence obtained through unethical or coercive means is entirely inadmissible in any credible and responsible academic forum.
458	incorruptible	adj.	The long-term integrity of science depends fundamentally on fully incorruptible and consistently transparent reporting practices.
459	indefatigable	adj.	An indefatigable and unwavering personal commitment to accuracy and honesty distinguishes the truly best academic researchers.
460	indisputable	adj.	The accumulated evidence that sustained human activity is the primary driver of climate change is now entirely indisputable.
461	ineluctable	adj.	The ineluctable conclusion drawn from all available data is that truly immediate and coordinated action is absolutely and urgently required.
462	inexorable	adj.	The inexorable and accelerating rise in average global temperatures demands an urgent, coordinated, and sustained international response.
463	infallible	adj.	No scientific method or framework is ever fully infallible; all findings must always remain open to scrutiny and potential revision.
464	inhibit	v.	Overly restrictive and bureaucratic ethical guidelines can sometimes inhibit genuinely valuable and important academic research.
465	innate	adj.	A genuine love of learning and an innate intellectual curiosity are widely recognised hallmarks of truly great researchers.
466	insightful	adj.	Her insightful and original analysis of the complex data revealed important patterns that had been consistently and previously overlooked.
467	instigate	v.	The unexpected and surprising new data effectively instigated a complete and thorough review of the entire existing theoretical model.
468	intrepid	adj.	The intrepid and dedicated researcher determinedly continued her demanding fieldwork despite considerable and persistent physical hardship.
469	laborious	adj.	The laborious and time-consuming process of primary data collection required many months of demanding and painstaking fieldwork.
470	laconic	adj.	His characteristically laconic writing style made even the most demanding theoretical concepts genuinely accessible to a wide audience.
471	laudable	adj.	The strong institutional commitment to open-access publishing is a laudable and genuinely important and progressive step forward.
472	lenient	adj.	The assessment committee was somewhat lenient in its evaluation of the first and admittedly imperfect submission.
473	lucidity	n.	The remarkable lucidity of her writing allowed even a non-specialist audience to follow and engage with the complex argument.
474	meander	v.	A well-structured academic essay should never meander aimlessly; every single paragraph must serve a clear and explicitly stated purpose.
475	obstinate	adj.	An obstinate refusal to engage with contradictory evidence is intellectually dishonest and ultimately self-defeating.
476	ostentatious	adj.	Ostentatious use of obscure vocabulary rarely improves the quality of academic writing.
477	outstrip	v.	Demand for the new treatment quickly outstripped the available supply.

478	painstaking	adj.	The painstaking reconstruction of the original dataset took over a year to complete.
479	palpable	adj.	There was a palpable sense of anticipation when the landmark results were published.
480	paradoxical	adj.	It is paradoxical that increasing connectivity can intensify social fragmentation.
481	pedantry	n.	Excessive pedantry about minor technicalities obscures the substance of the argument.
482	perceptive	adj.	The most perceptive researchers notice patterns that others consistently overlook.
483	perennial	adj.	Underfunding of education is a perennial problem in many developing countries.
484	perspicacious	adj.	Her perspicacious reading of the data revealed a previously unrecognised causal pathway.
485	perturb	v.	The unexpected findings perturbed the existing theoretical consensus significantly.
486	plausibility	n.	The plausibility of the proposed mechanism was immediately challenged by peer reviewers.
487	polemical	adj.	The polemical tone of the essay undermined its potential impact on serious policy audiences.
488	preamble	n.	The lengthy preamble delayed the reader from reaching the paper's central argument.
489	preeminent	adj.	She is the preeminent authority on this specific aspect of cognitive development.
490	premature	adj.	Drawing conclusions from such a small sample would be premature and methodologically unsound.
491	principled	adj.	A principled approach to research design prioritises validity over convenience.
492	probing	adj.	The committee's probing questions exposed several inconsistencies in the research design.
493	propensity	n.	There is a propensity among some researchers to overstate the certainty of their findings.
494	propitious	adj.	The timing was propitious — public and political attention was focused precisely on the issue.
495	proportionate	adj.	A proportionate response to emerging evidence neither overstates nor minimises its significance.
496	accolade	n.	The team received significant academic accolade for their innovative methodology.
497	alacrity	n.	The research community responded with alacrity to the call for submissions.
498	amalgamate	v.	The two datasets were carefully amalgamated to increase statistical power.
499	amenable	adj.	The participants were amenable to the revised protocol without requiring additional consent.
500	ancillary	adj.	Ancillary datasets were consulted to corroborate the primary findings.

C1 · Advanced — Complete Word List

500 words · Word · Part of Speech · Example Sentence

#	WORD	POS	EXAMPLE SENTENCE
1	abate	v.	The severity of the storm began to abate only after several days.
2	aberration	adj.	The unusually cold summer was regarded as a statistical aberration.
3	abeyance	n.	The controversial plans were held in abeyance pending further investigation.
4	abrogate	v.	The government moved to abrogate the outdated and ineffective environmental treaty.
5	abstain	v.	Several key nations chose to abstain from the critical vote on emissions.
6	abstraction	n.	Pure mathematical abstraction can sometimes yield remarkably practical applications.
7	acerbic	adj.	The reviewer's acerbic critique highlighted several fundamental weaknesses in the argument.
8	adumbrate	v.	The paper briefly adumbrates the theoretical framework developed in later chapters.
9	adversarial	adj.	An adversarial approach to international negotiation rarely produces durable solutions.
10	affinity	n.	There is a clear affinity between linguistic ability and academic writing performance.
11	allay	v.	Stronger and clearer communication from authorities helped allay public fears significantly.
12	allude	v.	The researcher carefully alludes to earlier seminal work without directly quoting it.
13	ambiguity	n.	The inherent ambiguity of the original wording led to serious misinterpretation.
14	ameliorate	v.	Sustained investment in public health can ameliorate the worst effects of poverty.
15	anachronistic	adj.	Critics argue that the current regulatory framework is fundamentally anachronistic.
16	analogous	adj.	This biological process is entirely analogous to the immune system's response.
17	antithetical	adj.	Excessive consumerism is directly antithetical to sustainable development principles.
18	approbation	n.	The groundbreaking study received widespread approbation from the academic community.
19	apprehension	n.	There is growing public apprehension about the long-term consequences of automation.
20	arcane	adj.	The highly arcane nature of the research limited its accessibility to non-specialists.
21	articulate	adj.	An articulate and well-structured argument is simultaneously precise and persuasive.
22	assiduous	adj.	Her assiduous approach to reviewing all available literature set her work apart.

23	assimilate	v.	It takes considerable time to fully assimilate genuinely complex theoretical frameworks.
24	attrition	n.	Staff attrition rates remained problematically high throughout the entire recession.
25	augment	v.	Research capacity can be significantly augmented through genuine international collaboration.
26	axiom	n.	It is a widely accepted axiom in development economics that education drives progress.
27	bedrock	n.	Empirical evidence is the bedrock upon which all scientific understanding is built.
28	belabour	v.	There is little value in belabouring a point that has already been established.
29	benevolent	adj.	The organisation played a genuinely benevolent role in the wider community.
30	bilateral	adj.	The two nations concluded a landmark bilateral trade and environmental agreement.
31	brevity	n.	In academic writing, brevity and precision are equally important virtues.
32	burgeon	v.	The renewable energy sector is burgeoning rapidly in response to climate pressures.
33	byzantine	adj.	The byzantine complexity of the regulatory framework frustrated even experienced practitioners.
34	cacophony	n.	The competing voices in the policy debate created a cacophony of contradictory claims.
35	capitulate	v.	Under sustained pressure from the public, the government eventually capitulated.
36	catalyst	n.	Education acts as the most powerful catalyst for lasting economic and social change.
37	causal	adj.	Researchers identified a clear and direct causal link between diet and disease.
38	caustic	adj.	The caustic editorial drew considerable attention to the government's environmental failures.
39	circumvent	v.	Some corporations attempt to circumvent environmental regulations through complex structures.
40	clandestine	adj.	The clandestine nature of the negotiations undermined subsequent public trust in the outcome.
41	coalesce	v.	Multiple research streams are beginning to coalesce into a single unified theoretical model.
42	cogent	adj.	The paper presents a cogent, well-evidenced, and thoroughly coherent argument.
43	coherence	n.	Logical coherence is arguably the single most important feature of academic argumentation.
44	collateral	adj.	Significant collateral damage to biodiversity was an unintended policy consequence.
45	commodity	n.	In an era of growing scarcity, clean water is an increasingly precious commodity.

46	compelling	adj.	The documentary presents a genuinely compelling case for fundamental systemic change.
47	complacency	n.	Complacency about environmental risks is one of the most dangerous obstacles to progress.
48	complicit	adj.	Governments that ignore credible warnings about emissions are complicit in the damage.
49	compunction	n.	The corporation showed no compunction in prioritising profit over environmental safety.
50	concomitant	adj.	Economic growth was accompanied by concomitant and deeply troubling rises in inequality.
51	conducive	adj.	A stable and transparent political environment is highly conducive to sustainable growth.
52	conjecture	n.	Without robust empirical evidence, the claim must be regarded as mere conjecture.
53	contentious	adj.	The proposed redistribution of wealth remains a deeply contentious political issue.
54	contingent	adj.	The ultimate outcome is highly contingent upon several currently unpredictable factors.
55	contrite	adj.	A genuinely contrite acknowledgement of past failures is essential for rebuilding trust.
56	converge	v.	Multiple independent lines of research are converging on a single compelling explanation.
57	corroborate	v.	The new findings clearly corroborate the central hypothesis proposed a decade ago.
58	credulous	adj.	Credulous readers may readily accept misinformation without adequate critical scrutiny.
59	culminate	v.	Years of dedicated research finally culminated in a landmark scientific publication.
60	cursory	adj.	A cursory reading of the available evidence is wholly insufficient for serious analysis.
61	dearth	n.	There is a notable dearth of rigorous longitudinal studies on this important topic.
62	delineate	v.	The paper carefully delineates the conceptual boundaries of the proposed framework.
63	demographic	n.	The rapidly ageing demographic presents major long-term challenges for public services.
64	derivative	adj.	Critics argued that the research was largely derivative and lacked genuine originality.
65	dichotomy	n.	There is a fundamentally false dichotomy between economic growth and environmental protection.
66	diffidence	n.	Her characteristic diffidence belied the sheer breadth and depth of her scholarly expertise.
67	diffuse	v.	Information can diffuse with extraordinary rapidity through large-scale social media networks.

68	discrepancy	n.	There is a significant and unexplained discrepancy between the two sets of results.
69	disinterested	adj.	All scientific inquiry should ideally be conducted by disinterested and impartial researchers.
70	disseminate	v.	Peer-reviewed journals effectively disseminate important research findings to a global audience.
71	divergent	adj.	Deeply divergent political opinions make achieving genuine international consensus very difficult.
72	dogmatic	adj.	A rigidly dogmatic approach to policy-making consistently and dangerously ignores contrary evidence.
73	ebullient	adj.	The research team was ebullient following the unexpected and highly significant discovery.
74	edifice	n.	The entire legislative edifice underpinning current environmental law urgently requires radical reform.
75	egregious	adj.	The report documented several egregious violations of fundamental environmental regulations.
76	elicit	v.	The carefully designed survey was created specifically to elicit honest candid responses.
77	elucidate	v.	The professor attempted to elucidate the most technically complex theoretical concepts clearly.
78	embody	v.	A truly democratic constitution should embody the most fundamental values of the society.
79	empiricism	n.	Empiricism holds that all genuine knowledge must ultimately be grounded in observable evidence.
80	encapsulate	v.	A strong conclusion should effectively encapsulate the central argument of the entire essay.
81	endemic	adj.	Corruption is unfortunately endemic in some poorly governed and institutionally weak states.
82	engender	v.	Prolonged economic instability and uncertainty inevitably engenders widespread and deep social anxiety.
83	epistemology	n.	Epistemology is the philosophical study of the nature, sources, and limits of knowledge.
84	equivocal	adj.	The overall evidence on this important theoretical point remains genuinely equivocal.
85	erudite	adj.	The erudite professor consistently explained even the most complex concepts with admirable clarity.
86	esoteric	adj.	The highly esoteric nature of the paper's content severely limited its wider readership.
87	exacerbate	v.	Worsening drought conditions will significantly exacerbate the already serious risk of food insecurity.
88	exonerate	v.	Newly discovered forensic evidence completely exonerated the researcher of all alleged wrongdoing.
89	expedite	v.	Digital tools can greatly expedite the often time-consuming process of primary data collection.

90	extol	v.	The comprehensive report extols the numerous virtues of a predominantly plant-based diet.
91	extrapolate	v.	Researchers carefully and systematically extrapolated future long-term trends from historical data.
92	facile	adj.	A facile response to a genuinely complex problem often creates further and worse difficulties.
93	fallacious	adj.	The argument is fundamentally and critically weakened by several clearly fallacious assumptions.
94	fallacy	n.	It is a well-established fallacy to assume that economic growth alone reduces poverty.
95	feasibility	n.	A detailed and rigorous feasibility study was carefully conducted before the project commenced.
96	fervour	n.	The dedicated research team approached the entire ambitious project with remarkable intellectual fervour.
97	flagrant	adj.	The company's flagrant disregard for established safety regulations was widely and justifiably condemned.
98	flux	n.	The global economy is currently in a sustained state of considerable and unpredictable flux.
99	formidable	adj.	The challenge of genuinely reversing the most serious effects of climate change is formidable.
100	forsake	v.	Society must not forsake long-term environmental sustainability for short-term economic convenience.
101	foster	v.	Education should always actively foster creativity, intellectual curiosity, and truly independent thought.
102	fragmented	adj.	A highly fragmented policy framework significantly reduces the overall effectiveness of interventions.
103	frugal	adj.	A genuinely frugal and disciplined approach to resource use is central to sustainable living.
104	germane	adj.	Only the most directly germane evidence should be carefully presented in an academic argument.
105	governance	n.	Effective and genuinely transparent governance is absolutely essential for achieving development goals.
106	granular	adj.	A truly granular analysis of the data reveals important patterns invisible at macro level.
107	groundbreaking	adj.	The study's remarkable findings were widely and justifiably described as genuinely groundbreaking.
108	harbinger	n.	A significant drop in bee populations is a deeply troubling harbinger of ecological collapse.
109	hegemony	n.	Cultural hegemony can systematically and insidiously suppress minority voices and perspectives.
110	heterogeneous	adj.	A more genuinely heterogeneous sample would be far more representative of the population.
111	heuristic	adj.	A heuristic approach allows researchers to solve complex problems through practical iteration.

112	holistic	adj.	A genuinely holistic approach considers physical, mental, and broader social dimensions together.
113	homogenise	v.	Globalisation tends to progressively homogenise previously diverse cultural practices and identities.
114	hyperbole	n.	Political speeches frequently and cynically rely on deliberate hyperbole to manipulate emotions.
115	iconoclast	n.	The iconoclastic researcher bravely challenged many of the most firmly accepted theoretical assumptions.
116	ideology	n.	Government policy is inevitably and inescapably shaped by both ideological assumptions and evidence.
117	immutable	adj.	No physical law is truly immutable; all scientific knowledge is subject to revision.
118	impartial	adj.	An impartial and genuinely thorough review of all the evidence is essential.
119	imperialism	n.	Economic imperialism can severely undermine the political and economic sovereignty of weaker states.
120	impetus	n.	The unexpected discovery provided the critical impetus for an important new programme of research.
121	impeccable	adj.	Her entire academic record throughout her undergraduate career was genuinely and remarkably impeccable.
122	impervious	adj.	Some policymakers appear completely impervious to the overwhelming evidence on environmental risk.
123	inadvertent	adj.	The inadvertent release of sensitive data raised serious and immediate ethical concerns.
124	incisive	adj.	The journal article offers a remarkably incisive and penetrating critique of current education policy.
125	incongruent	adj.	The anomalous result was entirely incongruent with all of the previous experimental findings.
126	indeterminate	adj.	The precise long-term outcome of the intervention remains stubbornly indeterminate at this stage.
127	indigenous	adj.	Indigenous knowledge systems offer genuinely valuable and often overlooked insights into local ecology.
128	inextricable	adj.	Poverty and chronic poor health are inextricably and profoundly linked in complex ways.
129	infer	v.	What can we legitimately and logically infer from the limited data presented in the graph?
130	inherently	adv.	Technology is not inherently good or bad; its value depends entirely on application and context.
131	insidious	adj.	The insidious and cumulative effects of long-term misinformation accumulate dangerously over time.
132	instantiate	v.	The case study effectively instantiates the broader theoretical framework proposed earlier.
133	interdisciplinary	adj.	An interdisciplinary approach deliberately draws on multiple fields of specialised academic study.

134	internalise	v.	Students must deeply and thoroughly internalise key grammatical rules for accurate language production.
135	intrinsic	adj.	Education has profound intrinsic value that extends far beyond its direct economic benefits.
136	irreversible	adj.	Scientists repeatedly warn that some of the most serious environmental damage is already irreversible.
137	juxtapose	v.	The essay effectively and illuminatingly juxtaposes two opposing theoretical viewpoints.
138	laud	v.	The groundbreaking study was widely lauded by experts for its rigorous and innovative methodology.
139	legitimate	adj.	There are clearly legitimate and serious concerns about the adequate protection of personal data.
140	lexical	adj.	A wide and sophisticated lexical range is directly rewarded in all IELTS Writing tasks.
141	lucid	adj.	A truly lucid and well-organised explanation helps even non-specialist readers follow complex arguments.
142	lucrative	adj.	The renewable energy sector is rapidly becoming increasingly lucrative for long-term investors.
143	malleable	adj.	Public opinion is surprisingly malleable and can be effectively shaped by sustained media narratives.
144	manifest	v.	The most serious long-term consequences of widespread deforestation manifest as total biodiversity collapse.
145	marginalise	v.	Economic policies that consistently marginalise the poorest communities are ultimately and deeply counterproductive.
146	mendacious	adj.	Mendacious reporting of scientific data has serious and far-reaching consequences for sound policy.
147	meritocratic	adj.	A truly meritocratic education system should always reward genuine talent and sustained effort.
148	meticulous	adj.	The researcher was extraordinarily meticulous in carefully documenting every single stage of the experiment.
149	mitigate	v.	Strategic and ambitious tree-planting programmes can help significantly mitigate the effects of climate change.
150	modality	n.	The grammatical modality of the main verb expresses the writer's precise degree of epistemic certainty.
151	multifaceted	adj.	Climate change is an extraordinarily multifaceted and complex problem that requires many coordinated solutions.
152	mundane	adj.	Even seemingly mundane and unremarkable data can reveal highly significant patterns when carefully analysed.
153	nascent	adj.	The nascent renewable energy industry still requires substantial and sustained government investment and support.
154	nebulous	adj.	The stated policy goals were far too nebulous and vague to be meaningfully measured.
155	negate	v.	The compelling new evidence entirely negated the previously widely accepted theoretical model.

156	nefarious	adj.	The nefarious and illegal activities of some corporations have caused truly irreparable environmental damage.
157	negligible	adj.	The measurable statistical difference between the two experimental groups was found to be negligible.
158	normative	adj.	The report makes explicit normative claims about what governments have a clear moral duty to do.
159	nuanced	adj.	This highly complex and multifaceted issue requires careful, nuanced, and well-contextualised analysis.
160	obdurate	adj.	Obdurate institutional resistance to necessary change consistently and significantly slows important progress.
161	objectivity	n.	Rigorous and genuine academic writing demands the very highest possible level of objectivity.
162	obfuscate	v.	Unnecessarily dense and specialised jargon can obfuscate rather than helpfully clarify a complex argument.
163	obsequious	adj.	Obsequious agreement with authority is entirely distinct from genuine and considered intellectual engagement.
164	omnipresent	adj.	Digital technology has now become genuinely omnipresent in virtually every aspect of modern daily life.
165	ontological	adj.	The research raises fundamental and profound ontological questions about the very nature of knowledge.
166	opaque	adj.	The deliberately opaque nature of government decision-making processes fundamentally undermines accountability.
167	ostensibly	adv.	The controversial policy was ostensibly introduced to protect important consumer interests.
168	overt	adj.	There is now an overt and unambiguous acknowledgement of the role of human activity in climate change.
169	paradigm	n.	The wholly unexpected discovery led to a major and genuinely disruptive paradigm shift in the field.
170	paradox	n.	It is a profound and troubling paradox that greater digital connectivity can lead to deeper personal isolation.
171	paramount	adj.	Complete and uncompromising accuracy is of paramount importance in all forms of academic writing.
172	parochial	adj.	A parochial and narrow perspective severely and fundamentally limits our broader understanding of global challenges.
173	partisan	adj.	Openly partisan and ideologically biased reporting significantly distorts public understanding of complex issues.
174	pedagogy	n.	Genuinely effective pedagogy is always carefully and thoughtfully adapted to the diverse needs of individual learners.
175	pedantic	adj.	Overly pedantic criticism of minor errors can obscure the genuine value and insight of a strong argument.
176	permeate	v.	The transformative and far-reaching effects of digital technology permeate every aspect of contemporary life.
177	perfunctory	adj.	A perfunctory and superficial review of the literature is wholly inadequate for serious academic research.

178	perpetuate	v.	Discriminatory and exclusionary institutional practices inevitably perpetuate deep-rooted social inequality.
179	pervasive	adj.	The pervasive and inescapable influence of technology on modern daily life is now entirely undeniable.
180	pertinent	adj.	Only the most directly pertinent and relevant evidence should be carefully selected for inclusion.
181	pivotal	adj.	The landmark 2015 Paris Agreement was genuinely and historically pivotal in global climate negotiations.
182	placate	v.	Short-term and largely cosmetic measures were hurriedly introduced to placate growing public concern.
183	plethora	n.	A plethora of peer-reviewed studies now strongly confirms the link between diet and mental health.
184	poignant	adj.	The powerful documentary offered a deeply poignant and moving account of irreversible environmental destruction.
185	polarisation	n.	Growing and deepening political polarisation makes effective international cooperation increasingly difficult.
186	ponderous	adj.	A ponderous and unnecessarily dense writing style can completely and fatally obscure an interesting argument.
187	posit	v.	The researcher posited that early dietary patterns are the single primary cause of the condition.
188	postulate	v.	Classical economists traditionally postulate that fully free markets naturally tend towards economic equilibrium.
189	pragmatic	adj.	A genuinely pragmatic solution always carefully balances idealism with real-world practical constraints.
190	precarious	adj.	The ecological balance of our planet is now in an increasingly precarious and deeply fragile state.
191	preclude	v.	High and prohibitive costs should not preclude anyone from accessing quality education.
192	prescient	adj.	The early and repeated warnings of leading climate scientists have proved remarkably prescient.
193	prevalent	adj.	Chronic non-communicable diseases are becoming increasingly and alarmingly prevalent in developing countries.
194	prioritise	v.	Governments should clearly and decisively prioritise substantial investment in genuinely affordable clean energy.
195	prodigious	adj.	The sheer volume of primary data collected throughout the study was truly prodigious.
196	profound	adj.	Climate change will undoubtedly have a profound, lasting, and transformative effect on human societies.
197	projection	n.	Current demographic projections strongly suggest that major cities will continue to grow dramatically.
198	prolific	adj.	She was an exceptionally prolific and highly influential researcher who published over two hundred papers.
199	propagate	v.	It is deeply irresponsible and harmful to propagate deliberate misinformation in public discourse.

200	proportional	adj.	Any political response to environmental threats should be fully and appropriately proportional to their severity.
201	proscribe	v.	The use of deceptive or manipulative research methods is firmly proscribed by international ethical guidelines.
202	provoke	v.	The highly controversial and unexpected study provoked a significant and wide-ranging academic debate.
203	qualitative	adj.	Qualitative research explores meaning, lived experience, and interpretation rather than statistical patterns.
204	quantitative	adj.	Quantitative methods allow for precise statistical comparison and cautious broader generalisation.
205	quintessential	adj.	This landmark paper is widely regarded as the quintessential example of truly interdisciplinary research.
206	radical	adj.	A radical and fundamental transformation of our collective lifestyle is necessary to reduce emissions.
207	rationale	n.	Always provide a clear, well-argued, and explicitly stated rationale for your main argument.
208	recalcitrant	adj.	Recalcitrant institutions and organisations are often the single greatest obstacle to meaningful reform.
209	rectify	v.	Urgent and decisive steps must be taken immediately to rectify the serious damage caused by past policies.
210	redress	v.	New and comprehensive legislation aims to redress longstanding and deeply rooted historical inequalities.
211	reductive	adj.	A reductive and oversimplified analysis inevitably fails to do justice to genuinely complex phenomena.
212	reify	v.	Academic language can subtly reify social distinctions and make fundamentally arbitrary categories seem natural.
213	relegate	v.	Environmental concerns have been consistently and irresponsibly relegated to the margins of the policy debate.
214	relentless	adj.	The relentless and accelerating growth of urbanisation poses formidable and urgent sustainability challenges.
215	remonstrate	v.	Environmental activists publicly and passionately remonstrated with senior government officials over persistent inaction.
216	repudiate	v.	The entire scientific community promptly and unanimously repudiated the fraudulent and fabricated research.
217	resilient	adj.	More genuinely resilient communities consistently recover more quickly and effectively from natural disasters.
218	resolute	adj.	A resolute and unwavering commitment to evidence-based policy is essential for effective and trustworthy governance.
219	reticent	adj.	Some key governments remain frustratingly reticent about committing to fully binding emissions reduction targets.
220	reverence	n.	The extraordinary findings were received with genuine reverence and admiration by the academic community.
221	rigorous	adj.	A rigorous and entirely transparent research methodology greatly and consistently improves academic credibility.

222	robust	adj.	The central argument of the essay is supported by genuinely robust and ultimately convincing evidence.
223	rudimentary	adj.	A rudimentary understanding of basic statistics is essential for correctly interpreting research data.
224	sacrosanct	adj.	The fundamental and widely accepted principle of academic freedom should be treated as absolutely sacrosanct.
225	scepticism	n.	Principled and healthy scepticism is a genuinely fundamental and indispensable virtue in all scientific inquiry.
226	scrupulous	adj.	A truly scrupulous researcher documents all data fully and transparently, even when results are disappointing.
227	scrutinise	v.	The independent committee agreed to carefully scrutinise all new evidence before revising its recommendations.
228	singular	adj.	The remarkable discovery was of truly singular and far-reaching importance to the entire academic field.
229	sobering	adj.	The very latest climate projections provide a deeply sobering and urgent reminder of the need for action.
230	solidarity	n.	International solidarity and genuine cooperation are absolutely essential in effectively addressing global poverty.
231	solicit	v.	Researchers carefully and systematically solicited feedback from a broad and representative range of participants.
232	speculative	adj.	Without adequate empirical support, the central and controversial argument must be regarded as entirely speculative.
233	steadfast	adj.	A steadfast and unwavering commitment to evidence is the defining mark of a truly reliable scientist.
234	stark	adj.	There is a stark, deeply troubling, and undeniable contrast between wealthy and impoverished nations.
235	stigmatise	v.	It is both harmful and profoundly unjust to stigmatise entire communities based on socioeconomic status.
236	stoic	adj.	A stoic acceptance of failure is fundamentally different from a genuine willingness to learn and adapt.
237	strident	adj.	Strident and uncompromising opposition to necessary reform often delays fundamentally beneficial change.
238	substantive	adj.	The comprehensive and thorough review produced substantive and immediately actionable recommendations.
239	succumb	v.	Some vulnerable species will inevitably succumb to the cumulative and accelerating effects of climate change.
240	supplant	v.	Digital media is rapidly and comprehensively supplanting traditional print journalism in most markets.
241	symbiotic	adj.	There is a mutually beneficial and deeply symbiotic relationship between scientific research and good policy.
242	temerity	n.	It requires considerable intellectual temerity to openly and publicly challenge deeply entrenched academic assumptions.
243	temperate	adj.	A temperate and carefully measured tone is invariably and significantly more persuasive than emotional rhetoric.

244	tenacious	adj.	The most tenacious and determined researchers continue to pursue their hypotheses even when results are discouraging.
245	tepid	adj.	The international political response to the escalating crisis was widely and justifiably criticised as entirely tepid.
246	timorous	adj.	A timorous and overly cautious approach to essential policy reform produces only minimal and wholly ineffective change.
247	transient	adj.	The apparent and initially encouraging economic recovery ultimately proved surprisingly transient.
248	trite	adj.	Trite and entirely predictable conclusions significantly and unnecessarily undermine an otherwise strong and insightful essay.
249	turbulent	adj.	The prolonged and turbulent political environment made genuinely long-term strategic planning extremely challenging.
250	untenable	adj.	Under sustained and rigorous critical scrutiny, the government's original position became entirely politically untenable.
251	venerate	v.	Most intellectually open societies tend to venerate genuinely original thinkers who challenge accepted conventional wisdom.
252	verbose	adj.	Unnecessarily verbose and repetitive writing consistently and fatally obscures rather than helpfully clarifies the central argument.
253	veracious	adj.	A fully veracious and wholly honest account of the data is the absolute and non-negotiable foundation of good science.
254	vindicate	v.	Subsequent and widely observed events fully and comprehensively vindicated the original highly controversial policy decision.
255	visceral	adj.	The powerful and unflinching documentary provoked a deeply visceral and profoundly emotional reaction from audiences.
256	vitriolic	adj.	Vitriolic and unnecessarily personalised public debate rarely leads to constructive or durable policy outcomes.
257	voluminous	adj.	The voluminous and constantly growing body of evidence in favour of immediate climate action is impossible to ignore.
258	wane	v.	Public interest in the critical issue began to wane once the initial and intense media attention finally faded.
259	warranted	adj.	The high degree of widespread public alarm about continuously rising pollution levels is entirely and justifiably warranted.
260	withstand	v.	Strong, well-designed, and genuinely resilient democratic institutions must always be able to withstand intense political pressure.
261	zealotry	n.	Zealotry, even in the service of an entirely worthy cause, can ultimately and seriously undermine a movement's long-term credibility.
262	abstruse	adj.	The theoretical argument was so abstruse that only a small number of specialists could follow it.
263	acrimonious	adj.	The policy debate became deeply acrimonious as neither side was willing to make any meaningful compromise.
264	admonish	v.	The parliamentary committee formally admonished the agency for its persistent and troubling lack of transparency.
265	affirm	v.	The new and compelling evidence firmly affirms the well-established link between diet and long-term health outcomes.

266	panacea	n.	Technology alone is definitely not a panacea for all of society's deepest, most complex, and most deeply rooted structural problems.
267	abhor	v.	Thoughtful researchers abhor the deliberate misrepresentation of data.
268	comprehensive	adj.	A comprehensive literature review is expected in all doctoral theses.
269	consensus	n.	There is now a clear international consensus on the urgency of climate action.
270	diversity	n.	Intellectual diversity within research teams consistently produces more innovative and robust outcomes.
271	efficacy	n.	The efficacy of the new treatment has been confirmed and replicated by multiple independent studies.
272	egalitarian	adj.	A truly egalitarian education system provides all children with a genuinely equal opportunity to succeed.
273	extravagant	adj.	Extravagant claims unsupported by robust evidence have no legitimate place in serious academic writing.
274	fortitude	n.	Conducting meaningful longitudinal research consistently over many years requires enormous personal dedication and intellectual fortitude.
275	hallmark	n.	Precision and clarity of language are widely and consistently regarded as the hallmarks of strong and effective academic writing.
276	implication	n.	The study's findings have serious and genuinely far-reaching implications for public health policy at both national and global levels.
277	intransigent	adj.	Deeply intransigent political opposition to reform significantly delayed the passage of urgently needed environmental legislation.
278	irrefutable	adj.	The accumulated scientific evidence against the continued widespread use of fossil fuels is now widely regarded as irrefutable.
279	latent	adj.	There is considerable latent potential in many underserved and disadvantaged communities that quality education can effectively unlock.
280	oust	v.	The discredited theory was gradually ousted by a more empirically robust alternative.
281	perilous	adj.	Ignoring the mounting evidence on climate risk is a genuinely perilous course of action.
282	reactionary	adj.	Reactionary responses to innovation often delay genuinely beneficial social progress.
283	recalibrate	v.	Following the new data, researchers were forced to recalibrate their theoretical models.
284	recourse	n.	Affected communities had little recourse when corporate accountability mechanisms failed.
285	reflective	adj.	A reflective practitioner regularly and honestly examines their own assumptions and methods.
286	refute	v.	The paper set out to refute the dominant theory with a series of controlled experiments.
287	remediate	v.	Comprehensive programmes were introduced to remediate the environmental contamination.
288	salient	adj.	The most salient finding was the unexpected correlation between the two variables.

289	saturate	v.	A market that is fully saturated with similar products leaves little room for new entrants.
290	seminal	adj.	The seminal study of 1975 remains a foundational reference in this field to this day.
291	sequester	v.	Forests play a critical role in sequestering carbon and regulating global temperatures.
292	shrewd	adj.	A shrewd observer of the data would notice that the effect disappears at higher doses.
293	skeptical	adj.	Peer reviewers are trained to be appropriately skeptical of extraordinary new claims.
294	sophisticated	adj.	A sophisticated understanding of statistics is increasingly expected in applied research.
295	spurious	adj.	The spurious correlation in the dataset was the result of an uncontrolled confounding variable.
296	steadily	adv.	Public support for renewable energy has steadily and consistently increased over the decade.
297	stipulate	v.	The funding agreement stipulates that all findings must be published in open-access journals.
298	stratum	n.	The sample was stratified to ensure representation from every socioeconomic stratum.
299	stringent	adj.	Stringent quality controls are essential to maintain the reliability of long-term datasets.
300	subjugate	v.	Historical power structures have often been used to subjugate minority perspectives.
301	substantiate	v.	The author needs to substantiate each major claim with specific and verifiable evidence.
302	subvert	v.	Vested interests can subvert the integrity of the research process at multiple stages.
303	superficial	adj.	A superficial engagement with the literature is insufficient for doctoral-level work.
304	superfluous	adj.	The final two paragraphs of the conclusion were superfluous and should be removed.
305	supplementary	adj.	Supplementary data tables are provided in the appendix for completeness.
306	tacit	adj.	There was a tacit understanding among the committee members that further investigation was needed.
307	tangential	adj.	The discussion of historical context became tangential and detracted from the main argument.
308	tenuous	adj.	The link between the two variables is tenuous and requires far more investigation.
309	theoretical	adj.	The paper is primarily theoretical, though it draws on a range of empirical examples.
310	timely	adj.	A timely and well-targeted intervention can prevent minor problems from escalating.

311	tractable	adj.	The problem, though complex, appears tractable with the right combination of methods.
312	truncate	v.	The analysis was truncated due to resource limitations, affecting the depth of the findings.
313	ubiquitous	adj.	The assumption is so ubiquitous in the field that it is rarely examined or questioned.
314	unambiguous	adj.	The evidence should be unambiguous before drawing strong and categorical conclusions.
315	underpinning	n.	A clear theoretical underpinning is essential for any well-designed empirical study.
316	unequivocal	adj.	The results were unequivocal in their support for the original hypothesis.
317	unfounded	adj.	The claim was widely circulated despite being entirely unfounded and unverified.
318	unprecedented	adj.	The scale of the challenge is unprecedented in the entire history of the discipline.
319	unsubstantiated	adj.	Unsubstantiated allegations of bias in the peer review process were quickly dismissed.
320	validity	n.	The validity of the measure depends on whether it accurately captures the underlying concept.
321	verifiable	adj.	All claims in academic writing should be clearly verifiable and properly cited.
322	verity	n.	The search for objective verity, though imperfect, remains a central goal of science.
323	vibrant	adj.	A vibrant and open intellectual culture encourages risk-taking and creative thinking.
324	vigilant	adj.	Researchers must remain vigilant against unconscious bias throughout the study.
325	vocation	n.	For many academics, research is a deeply felt vocation as much as a profession.
326	well-founded	adj.	The criticism was well-founded and acknowledged openly by the authors in the revision.
327	zealous	adj.	A zealous commitment to a single theory can cloud judgement and bias interpretation.
328	obfuscation	n.	The deliberate obfuscation of methodology makes independent replication impossible.
329	omniscient	adj.	No theoretical framework can be omniscient — all models simplify reality.
330	opprobrium	n.	The researcher faced widespread opprobrium after the data manipulation was discovered.
331	ostracise	v.	Communities that ostracise dissenting voices ultimately impair their own intellectual development.
332	palliative	adj.	The minor reform was widely seen as palliative rather than genuinely transformative.
333	anachronism	n.	Treating pre-digital methods as a baseline creates a serious analytical anachronism.

334	abscond	v.	The researcher appeared to abscond with the dataset when funding ended.
335	abstemious	adj.	An abstemious approach to claiming causal conclusions is a sign of methodological maturity.
336	adduce	v.	The paper adduces several lines of independent evidence in support of the hypothesis.
337	adulation	n.	Uncritical adulation of influential researchers can impede genuine scientific scrutiny.
338	aegis	n.	The study was conducted under the aegis of the national research council.
339	agglomerate	v.	Cities agglomerate economic activity in ways that can both reduce and intensify inequality.
340	aggrandise	v.	The abstract appeared to aggrandise the significance of a modest and preliminary finding.
341	agitate	v.	The report agitated for a fundamental overhaul of the ethical review procedures.
342	allege	v.	The complaint alleged a systematic failure to obtain informed consent.
343	altercation	n.	A public altercation between two prominent researchers damaged the reputation of the field.
344	amelioration	n.	The amelioration of entrenched disadvantage requires sustained and coordinated effort.
345	amplification	n.	The amplification of minor signals into major claims is a known pathology in the literature.
346	antecede	v.	The theoretical framework must antecede the empirical design in any rigorous study.
347	appease	v.	Minor concessions were offered to appease critics without addressing their substantive concerns.
348	apprise	v.	All participants were fully apprised of their rights before the study commenced.
349	ardour	n.	The ardour of the early researchers in the field is captured in their foundational papers.
350	arraign	v.	The professional body arraigned the researcher for multiple violations of ethical protocols.
351	aspersion	n.	The reviewer cast aspersions on the team's integrity without providing supporting evidence.
352	assuage	v.	Detailed methodological transparency can assuage doubts about the validity of the findings.
353	attenuate	v.	The effect was attenuated when additional covariates were included in the model.
354	atypical	adj.	The atypical case study, though insightful, limits the generalisability of the conclusions.
355	auspicious	adj.	The early replication results were auspicious for the long-term prospects of the theory.
356	aver	v.	The authors aver that the design controls adequately for all major confounders.

357	balk	v.	Practitioners often balk at implementing research findings due to perceived contextual irrelevance.
358	bellicose	adj.	Bellicose peer review exchanges generate heat but rarely light.
359	belligerent	adj.	A belligerent dismissal of counterevidence signals intellectual rigidity.
360	benefactor	n.	The anonymous benefactor whose donation funded the study requested no publication conditions.
361	bereft	adj.	The paper is bereft of the methodological detail needed to evaluate its claims.
362	besmirch	v.	Fabricating data besmirches not only the individual researcher but the entire institution.
363	bifurcate	v.	The analysis bifurcates the sample into two distinct groups to test the interaction hypothesis.
364	capricious	adj.	Capricious changes to the assessment criteria undermined the fairness of the evaluation.
365	castigate	v.	The editorial castigated journals that continue to publish results without sharing the underlying data.
366	chasten	v.	The failure to replicate the original finding chastened even the most ardent proponents.
367	circumlocution	n.	Excessive circumlocution in academic writing substitutes verbosity for clarity of thought.
368	circumscribe	v.	Ethical constraints appropriately circumscribe the methods available to researchers.
369	clemency	n.	The ethics board showed clemency in its final ruling, given the researcher's prior clean record.
370	coercion	n.	Any form of coercion in participant recruitment renders the consent invalid.
371	conciliatory	adj.	A conciliatory response to criticism is often more productive than an adversarial one.
372	confute	v.	The data confutes the claim that the two populations are equivalent on the key variable.
373	congenial	adj.	A congenial intellectual environment encourages risk-taking and creative thinking.
374	consign	v.	Null results are too often consigned to the filing cabinet rather than submitted for publication.
375	contumacious	adj.	The contumacious refusal of the institution to cooperate with the inquiry was noted in the report.
376	corrode	v.	Repeated exposure to poor-quality studies corrodes the intellectual standards of the field.
377	countermand	v.	The senior investigator countermanded the junior researcher's decision to amend the protocol.
378	covert	adj.	Covert observation methods raise significant ethical questions about participant awareness.
379	credulity	n.	The extraordinary claim required extraordinary evidence to overcome the reader's natural credulity.

380	culpable	adj.	Journals that perpetuate a culture of positive-result bias are culpable for the replication crisis.
381	dauntless	adj.	A dauntless willingness to question dominant paradigms is essential for scientific progress.
382	debase	v.	The practice of ghost writing debases the integrity of the authorship conventions.
383	debilitate	v.	Excessive administrative burden can debilitate a researcher's capacity for creative work.
384	decorum	n.	Academic debate should be conducted with decorum even when the disagreements are fundamental.
385	demur	v.	The committee demurred at the proposed expansion of the study without additional ethical review.
386	deprecate	v.	The field is right to deprecate practices that conflate effect size with statistical significance.
387	deride	v.	To deride methods that differ from one's own reflects disciplinary insularity rather than scientific judgement.
388	despicable	adj.	The fraudulent manipulation of data is despicable and carries severe consequences.
389	disenfranchise	v.	Barriers to participation disenfranchise communities whose perspectives are most needed.
390	disparage	v.	To disparage a researcher's competence rather than their argument is an ad hominem fallacy.
391	dissemble	v.	Any attempt to dissemble about the limitations of a study is a serious ethical violation.
392	dissuade	v.	Harsh peer review experiences often dissuade junior researchers from pursuing publication.
393	draconian	adj.	Draconian restrictions on data access impede legitimate scientific collaboration.
394	dubiety	n.	The reviewer expressed dubiety about the validity of the self-report measures used.
395	ecclesiastical	adj.	Studies of ecclesiastical institutions require particular sensitivity to institutional norms.
396	effigy	n.	The founding theorist's ideas were attacked more as an effigy than as a genuine intellectual position.
397	egalitarianism	n.	Methodological egalitarianism holds that no single approach has a monopoly on valid knowledge.
398	embroil	v.	The researcher became embroiled in a public controversy over undisclosed conflicts of interest.
399	enmity	n.	Personal enmity between researchers can distort the review process and damage the field.
400	equivocate	v.	The authors equivocate rather than committing to a clear and falsifiable prediction.
401	espouse	v.	The paper espouses a view that has gained traction but not yet achieved consensus.

402	excoriate	v.	The editorial excoriated the practice of undisclosed salami-slicing of datasets.
403	exhort	v.	Funding bodies exhort researchers to engage the public but rarely provide adequate support.
404	expeditious	adj.	An expeditious review process benefits both authors and the field.
405	explication	n.	A careful explication of the key constructs is essential before proceeding to operationalisation.
406	expostulate	v.	The senior researcher expostulated against the proposed changes to the analytical strategy.
407	exquisite	adj.	The exquisite precision of the measurement instrument was its principal strength.
408	extemporise	v.	Effective conference presenters can extemporise credibly when questions move beyond their notes.
409	fabrication	n.	Data fabrication is the most egregious form of research misconduct.
410	fanaticism	n.	Methodological fanaticism — the belief that one approach is always superior — is intellectually limiting.
411	fiasco	n.	The failed replication was widely described as a fiasco that undermined public trust in the field.
412	flippant	adj.	Flippant dismissal of legitimate methodological concerns is unprofessional.
413	foible	n.	Every researcher has professional foibles; good supervisors help identify and address them.
414	forbearance	n.	Scholarly forbearance in the face of provocation is a mark of genuine intellectual confidence.
415	fractious	adj.	The fractious relationship between the two co-authors was evident in the final publication.
416	fraudulent	adj.	A fraudulent co-authorship arrangement defrauds readers and distorts the scholarly record.
417	garrulous	adj.	Garrulous writing that says in fifty words what could be said in ten obscures rather than illuminates.
418	guile	n.	The use of guile in experimental deception designs must be disclosed and justified.
419	harangue	v.	The keynote speech devolved into a harangue against the peer review system.
420	hauteur	n.	Intellectual hauteur that dismisses alternative perspectives impoverishes scholarly debate.
421	hedonism	n.	Short-term hedonism in policy design sacrifices long-term sustainability for immediate approval.
422	histrionic	adj.	Histrionic responses to critical peer review undermine the collective enterprise of science.
423	homily	n.	The discussion section read as a moralising homily rather than a rigorous analytical account.
424	humility	n.	Intellectual humility — the recognition that one may be wrong — is a fundamental scientific virtue.

425	hypocritical	adj.	It is hypocritical to advocate for open data while refusing to share one's own datasets.
426	iconography	n.	The iconography of the scientific method has a powerful effect on public expectations.
427	idiosyncrasy	n.	A theorist's personal idiosyncrasy should not be mistaken for empirical innovation.
428	ignominious	adj.	The ignominious retraction of the paper was a significant set-back for the entire research group.
429	illusory	adj.	The apparent improvement in outcomes was illusory once the confounders were controlled for.
430	imbue	v.	A strong theoretical framework can imbue qualitative data with deeper analytical significance.
431	imperious	adj.	An imperious attitude towards junior collaborators damages the quality of joint research.
432	impetuous	adj.	Impetuous publication of preliminary data without sufficient replication is methodologically irresponsible.
433	implacable	adj.	The implacable opposition of vested interests has consistently blocked meaningful reform.
434	impugn	v.	The rebuttal attempted to impugn the integrity of the reviewing process.
435	impunity	n.	Engaging in questionable research practices with apparent impunity corrodes institutional trust.
436	incite	v.	Sensationalised reporting of preliminary findings can incite unfounded public alarm.
437	incoherence	n.	Logical incoherence at the level of the theoretical framework undermines the entire study.
438	indignation	n.	The justified indignation of the research community prompted a formal investigation.
439	indoctrinate	v.	Educational systems that indoctrinate rather than inform produce uncritical thinkers.
440	inefficacious	adj.	The intervention proved entirely inefficacious when the placebo-controlled trial was conducted.
441	ineptitude	n.	Methodological ineptitude can produce findings that are worse than no data at all.
442	infringe	v.	Some data-sharing mandates infringe intellectual property rights in ways that require careful negotiation.
443	ingenuity	n.	Methodological ingenuity is often required when the research question defies standard approaches.
444	iniquity	n.	The systemic iniquity of the academic reward structure disadvantages early-career researchers.
445	insolvency	n.	Financial insolvency of the host institution threatened the completion of the longitudinal study.
446	intercede	v.	The ethics committee interceded when it became clear that participant rights were not being respected.

447	inundate	v.	The team was inundated with requests for access to the dataset following publication.
448	irascible	adj.	An irascible response to methodological criticism signals intellectual fragility.
449	iterate	v.	Effective research design requires the capacity to iterate and refine based on initial findings.
450	jeopardise	v.	Premature disclosure of findings can jeopardise the integrity of ongoing data collection.
451	jettison	v.	It was necessary to jettison several of the original hypotheses after the pilot data.
452	lampoon	v.	Satirical commentary that lampoons poor-quality research can serve a genuine critical function.
453	languish	v.	Important findings can languish in obscurity if not communicated to the relevant audiences.
454	lethargic	adj.	Lethargic institutional responses to misconduct erode confidence in self-regulatory mechanisms.
455	levity	n.	Occasional levity in conference presentations can aid engagement without undermining credibility.
456	litigious	adj.	A litigious research environment in which criticism is met with legal threats stifles debate.
457	loathe	v.	Responsible researchers loathe the practice of selectively reporting favourable outcomes.
458	loquacious	adj.	Loquacious writing that buries key points in unnecessary detail diminishes the paper's impact.
459	lurid	adj.	Lurid media coverage of scientific findings typically misrepresents their significance.
460	malevolent	adj.	Attribution of malevolent intent to a methodological error is rarely justified.
461	maudlin	adj.	Maudlin appeals to the importance of the research question are no substitute for rigorous evidence.
462	mollify	v.	Additional disclosures were provided to mollify the concerns of the ethics review board.
463	moribund	adj.	Several once-dominant theoretical frameworks now appear largely moribund.
464	mutable	adj.	Scientific consensus is mutable — it should change when the evidence demands.
465	myopic	adj.	A myopic focus on a single outcome measure may obscure important trade-offs.
466	obtrude	v.	The researcher's personal views appeared to obtrude into what was presented as an objective analysis.
467	odious	adj.	The odious practice of gift authorship corrupts the reliability of the scholarly record.
468	officious	adj.	Officious gatekeeping of conference participation restricts the diversity of voices heard.
469	oligarchy	n.	An oligarchy of high-impact journals exerts disproportionate influence over the field's direction.

470	onerous	adj.	The onerous reporting requirements deterred many eligible institutions from applying.
471	opprobrious	adj.	Opprobrious labels attached to disfavoured methodologies discourage legitimate methodological pluralism.
472	palliate	v.	Short-term initiatives palliate visible problems without addressing their structural causes.
473	pander	v.	Journals that pander to institutional preferences over scientific merit do a disservice to knowledge.
474	patronise	v.	Writing that patronises the reader by over-explaining obvious points quickly loses its audience.
475	penitent	adj.	A genuinely penitent response to a serious methodological error requires public correction.
476	perfidious	adj.	Perfidious conduct in collaborative research — such as withholding data — corrodes trust.
477	pomposity	n.	Pomposity in academic writing substitutes tone for substance and alienates the reader.
478	pontificate	v.	Researchers should be wary of pontificating beyond the boundaries of their own evidence.
479	pragmatism	n.	Methodological pragmatism chooses approaches on the basis of fitness for purpose.
480	prevaricate	v.	When asked to account for the discrepancy, the author appeared to prevaricate.
481	procrastinate	v.	Researchers who procrastinate in sharing their datasets undermine the pace of cumulative progress.
482	profligate	adj.	A profligate use of statistical tests inflates the risk of false positive findings.
483	proliferation	n.	The proliferation of journals of dubious quality has diluted the signal in the academic literature.
484	propinquity	n.	The propinquity of the two research groups facilitated rapid and productive knowledge exchange.
485	provincial	adj.	A provincial reliance on studies from a single country limits the external validity of the review.
486	puerile	adj.	Puerile attempts to discredit a researcher personally rather than engage their argument are inexcusable.
487	pugnacious	adj.	A pugnacious refusal to acknowledge legitimate criticism eventually undermines scholarly credibility.
488	quandary	n.	The team found itself in a genuine quandary about how to handle the unexpected secondary finding.
489	querulous	adj.	Querulous objections to routine editorial requests are a poor use of everyone's time.
490	quixotic	adj.	The quixotic ambition to produce a fully unified theory proved inspiring but ultimately unrealisable.
491	rancour	n.	Professional rancour between rival groups has delayed progress on an important theoretical question.

492	rapacious	adj.	Rapacious data extraction from participants without reciprocal benefit raises serious ethical concerns.
493	recondite	adj.	Recondite theoretical arguments have their place, but must be made accessible to a broader audience.
494	rectitude	n.	Intellectual rectitude requires acknowledging evidence that contradicts one's own prior position.
495	reprehensible	adj.	The failure to disclose known limitations of the instrument is reprehensible.
496	reproach	n.	The field holds in reproach those who knowingly publish misleading findings.
497	rhetoric	n.	Persuasive rhetoric is no substitute for empirical evidence in academic argument.
498	risible	adj.	The claim, while made in apparent seriousness, was considered risible by most reviewers.
499	sanctimonious	adj.	Sanctimonious insistence on methodological purity can mask a reluctance to engage with messy reality.
500	satirise	v.	The paper satirises the conventions of academic writing to expose their arbitrary nature.
