Practice Passage

The Great Wall of China

The Great Wall of China is one of the most famous landmarks in the world. It is not just one long wall, but a series of walls built over many centuries to protect the Chinese Empire. The first parts of the wall were constructed as early as the 7th century BC. However, the most famous and well-preserved sections were built during the Ming Dynasty, between 1368 and 1644. The total length of the wall is estimated to be about 21,196 kilometres. Today, it attracts over 10 million visitors every year. The most popular section for tourists to visit is Badaling, which is located near Beijing.

Scanning Practice

Question 1: In which century were the first parts of the wall constructed?

Question 2: What is the estimated total length of the Great Wall?

Question 3: How many visitors does the wall attract each year?

Answers:

Answer: 7th century B

C Explanation: Scan for 'first parts' or 'constructed' \rightarrow 'constructed as early as the 7th century BC'.

21,196 kilometres **Explanation:** Scan for 'length' or a large number \rightarrow 'total length of the wall is estimated to be about 21,196 kilometres'.

Answer: over 10 million / 10 million **Explanation:** Scan for 'visitors' or 'every year' \rightarrow 'attracts over 10 million visitors every year'.
