

Skimming:

Smartwatches in Modern Life

Smartwatches have become incredibly popular over the last decade. Unlike traditional watches that only tell time, smartwatches act like mini-computers on your wrist. They can track your daily steps, monitor your heart rate, and even measure how well you sleep. In addition to health tracking, they allow users to receive text messages, answer phone calls, and control music without looking at their smartphones. While some people worry that these devices cause distractions, many users find that smartwatches help them stay organized and maintain a healthier lifestyle.

Quick Skim Questions

Question A: What is the main topic of the passage?

- A) The history of traditional watches
- B) Smartwatches — their features and benefits
- C) How to connect a watch to a smartphone
- D) The negative effects of modern technology

Question B: The writer's main purpose is to...

- A) Argue that traditional watches are no longer useful
- B) Sell a specific brand of smartwatch
- C) Inform readers about what smartwatches do and how they help
- D) Explain how to repair a broken screen

Answers:

Answer: B) Smartwatches — their features and benefits *Explanation: The first sentence introduces smartwatches, and the rest of the text lists their features (tracking steps, receiving messages) and benefits (healthier lifestyle).*

Answer: C) Inform readers about what smartwatches do and how they help *Explanation: The passage clearly describes the functions of the watch AND explains how it assists users in daily life — it informs.*
